QUESTION 1

A technician deployed a Communication Server 1000E with dual homing feature configured. Both the T and 2T ports are connected on the media Gateway Controller (MGC) one connection is active to avoid network loops.

Which two statements are true, if the connection to the active port on the MGC is host? (Choose two)

A. The MGC will issue a link down error.

B. The MGC will switch to the active pert.

C. The MGC and CPPM will have no loss of service.

D. The MGC will switch to the active port after 12 seconds.

Correct Answer: BC

QUESTION 2

A customer is planning to install and configure a Commercial Off the Shelf (COTS) server IBM X3550 as a Signaling Server for their Communication Server (CS) 1000 Rls.. 7x network.

Which two statements describe the software installation process? (Choose two)

A. Before Linux Base software, the COTS server must be configured as a member server.

B. Application software is loaded onto the COTS server using Deployment Manager.

C. Linux Base software and application software are pre-loaded onto the COTS server at the factory

D. Linux Base software is installed using command line interface and a bootable DVD containing software and operating system

Correct Answer: BD

QUESTION 3

A customer with a Communication Server (CS) 1000E at Rls. 5.5 with two IPMG is upgrading the system to CS 1000E SA release 7 x. The second media gateway includes a media Gateway Controller card with one high density DSP daughter board.

How many voice channels does this configuration provide?

A. 32

B. 64

C. 96

D. 128

Correct Answer: D

QUESTION 4

From which two ports is the Fully Qualified Domain Name (FQDN) composed, and in what order must they be configured?

A. First the host name and then the domain name

B. First the domain name and then the host name

C. First the COTS server IP address and then the port number

D. First the COTS server port number and then the IP address

Correct Answer: A

QUESTION 5

A technician is upgrading an existing Option 11C 5.5 system to a Communication Server (CS) 1000E Rls. 7x Standard Availability with a single media Gateway 1000E chassis. A CPMG Co-Resident Server card is being deployed during the upgrade. This is a stand-alone system that is not part of a larger network so the CPMG will act as its own Primary Server.

Which application should be deployed on the CPMG server for this customer?

A. CS+SS+EM

B. CS+SS+SIPL

C. CS+SS+SubM

D. CS+SS

Correct Answer: D
