QUESTION 1

Refer to the exhibit to answer the question.

1.

 Using YourCo marketplace, companies can quickly search and locate products and services online.

2.

 Once a company finds a products or service suitable for their need, the company can solicit pricing information (quotations) from various sellers.

3.

 Multiple sellers of a same kind product or service can bid to sell a product.

4.

 Once the company finalizes the desired product(s), price and seller, it notifies the seller sends an invoice to the customer.

5.

 The marketplace interacts with banks on behalf of the sellers and buyers to execute the financial transitions of an exchange.

XML will be used extensively for data exchange between heterogeneous entities.

Once a financial transaction is completed after an exchange between a buyer and seller, the financial institution sends the transaction details as a large XML document. The marketplace application is required to persist just the status of the completed transaction (whether it succeeded or not) into a high-volume database in an efficient manner. Also, the source data can be assumed to be secure and conforming to an XML Schema. Which of the following can be done to make the related components high-performing and efficient?

A. Use a DOM Parser

B. Use a SAX Parser

C. Use XSL Transformation to match the status related constructs

D. Use event listener mechanisms to gather status details

E. Disable validity checking during parsing

Correct Answer: BDE

QUESTION 2

For which of the following would a developer select the SAX API over the DOM API?

A. Resolving element cross-references.

B. Outputting content in the order it appears.

C. Randomly accessing information in the document.

D. Searching for a particular text string in an element.

Correct Answer: BD

QUESTION 3

CSS and XSL can be BEST used together to:

A. Develop advanced transformations between XML DTDs.

B. Extend the capabilities of the HTML formatting model with CSS constructs.

C. Transform XML data on the server into HTML documents that link with CSS style sheets.

D. Allow XSL to directly process HTML documents.

Correct Answer: C

QUESTION 4

A company has a large customer database with over 100,000 entries, which will be processed as an XML document. The marketing and retail groups need to be able to use these entries in a variety of ways, such as by region or specific customer telephone number. There may be unforeseen ways to search the entries in the future. Given these requirements, which of the following is the BEST approach to achieve good performance?

A. Define id() functions for the different entry perspectives.

B. Define id() functions, one for each customer entry.

C. Define key() functions for the different entry perspectives.

D. Define key() functions, one for each customer entry.

Correct Answer: C

QUESTION 5

Which of the following statements are true about SOAP 1.1?

A. It is an object-based protocol like IIOP.

B. It can be implemented over SMTP.

C. It can be implemented over HTTP.

D. It cannot be used through firewalls.

E. It allows for both RPC-based and message-oriented communications.

Correct Answer: BCE
