QUESTION 1

Refer to the exhibit to answer the question.

1.
Using YourCo marketplace, companies can quickly search and locate products and services online.
2.
Once a company finds a products or service suitable for their need, the company can solicit pricing information (quotations) from various sellers.
3.
Multiple sellers of a same kind product or service can bid to sell a product.
4.
Once the company finalizes the desired product(s), price and seller, it notifies the seller sends an invoice to the customer.
5.
The marketplace interacts with banks on behalf of the sellers and buyers to execute the financial transitions of an exchange.
XML will be used extensively for data exchange between heterogeneous entities.

Buyer entities of the marketplace can search and discover sellers and interact with them. The discovery and interaction processes are very dynamic in nature. Which of the following can MOST logically be part of the application's architecture?

- A. Validation of XML data
- B. XSL matching for the search and discovery
- C. XML Query for the search and discovery
- D. UDDI for the search and discovery
- E. SOAP for communication between various entities

Correct Answer: ADE

QUESTION 2

Which of the following statements regarding XPath is TRUE?

- A. XPath is new enough that the W3C has not yet adopted it as a "recommendation".
- B. Using XPath, a developer can address portions of a DTD in a forward or backward direction.

- C. XPath's functionality is extended by XPointer.
- D. XPath is implemented with an object-based language.
- E. XPath uses XSLT, XSL FO, and other emerging technologies.

Correct Answer: C

QUESTION 3

An XML developer wants to leverage XML-related capabilities to convert an XML Schema into an object-based programming language's classes. What would be the BEST mechanism, if any, to accomplish this goal?

- A. Write an object-based application that reads the XML Schema and converts all the primitive datatypes to an object-based programming language's classes.
- B. Write an XSLT stylesheet that transforms the XML Schema to an object-based programming language's classes, using .
- C- Write an XSLT stylesheet that transforms the XML Schema to an object-based programming language's classes, using .
- C. There is NO relation between XML Schema and an object-based programming language's class.

Correct Answer: B

QUESTION 4

An organization is currently migrating its application to XML. The document instances are created mostly from back-end processes; however, they also receive accounts-receivable and bill-of-lading data from two business partners. Which of the following factors support the use of XML Schemas instead of DTD5 for validation?

- A. The vocabulary is proprietary.
- B. The DTD is comprised of internal and external subsets dependent on instance usage.
- C. Namespace support is being built into the application.
- D. Strong datatyping is needed by the application.

Correct Answer: CD

QUESTION 5

XML Schemas can be used to define which of the following?

- A. New built-in simple data types
- B. New data types with numeric range limitations
- C. New data types limited to an enumerated set of values
- D. New data types that must fit a particular format, such as a phone number

E. New data types automatically, based on actual values found in an XML document

Correct Answer: BCD
