### QUESTION 1

A program manager consults with a client on how to improve their BPM Center of Excellence (COE). The program manager asks what metrics are being used to track the success of the COE. The client offers examples of the metrics that are being collected for several processes related to the cycle time and efficiency. What course of action should the program manager suggest?

- A. Suggest no changes to the metrics.
- B. Suggest that an additional category of metrics for defect rates be collected.
- C. Suggest that the COE should aggregate information on the ROI for each project.
- D. Suggest that greater emphasis be granted to the metrics gathered on cycle time.

Correct Answer: C

---

### QUESTION 2

The BPM program manager and process owner for a new hire onboarding process project need to ensure that the solution developed by the team will be accepted and adopted by the target users. To facilitate this, they decide to:

- A. plan additional playbacks for user screens.
- B. agree with users to postpone the release until every feature is correct.
- C. involve champion SMEs in the discovery and implementation including playbacks.
- D. insist on documentation of all user requirements before having the development team begin work.

Correct Answer: C

---

### QUESTION 3

In the Playback 0 review session, the executive sponsor for BPM suggested adding a requirement to the business process not previously articulated. The executive sponsor would like to see the business requirement implemented by the next playback validation session. How should the program manager handle the previously unknown business requirement?

- A. Validate user story with process owner and schedule for a later iteration.
- B. Explain to the executive sponsor that the requirement will be implemented in the next iteration.
- C. Proceed with Playback 1 and include the new requirement in the set of requirements for the development phase.
- D. Find the best time in the development effort when resources are available to insert the business requirement implementation.

Correct Answer: A

---

#### QUESTION 4

A one day workshop has been completed, producing an inventory of 2 top-level business processes, 10 lower-level business processes, and 4 integrations. Which categorization of complexity is appropriate and which estimation method should be used in this scenario?

- A. Small, Rough Order of Magnitude (ROM)
- B. Small, Budgetary Estimate
- C. High, Rough Order of Magnitude (ROM)
- D. High, Budgetary Estimate

Correct Answer: C

---

#### QUESTION 5

After completing the initial process discovery and documentation work, the process definition and user story documentation needs to be reviewed to ensure that appropriate emphasis has been placed on process improvement and on identification and definition of appropriate process metrics. With whom does the program manager and process owner conduct this review?

- A. BPM Analyst
- B. BPM Architect
- C. BPM Developer
- D. BPM Administrator

Correct Answer: A
