QUESTION 1

When configuring more than one archival site, which statement is true?

A. The system will first attempt the transfer using the URL configured last.

B. The system will transfer the configuration to each archival site.

C. The system will not transfer to a secondary site unless the previous site fails.

D. The system will transfer using secure copy protocol (SCP) before attempting FTP.

Correct Answer: C

QUESTION 2

You must apply the family inet configuration parameter only to Gigabit Ethernet interfaces that are in FPC

2.

Which output applies to this configuration?

A. [edit groups]user@router# showge-int {interfaces { {unit 0 {family inet;}}}}

B. [edit groups]user@router# showge-int {interfaces { {unit 0 {family inet;}}}}

C. [edit groups]user@router# showge-int {interfaces { {unit 0 {family inet;}}}}

D. [edit groups]user@router# showge-int {interfaces { {unit 0 {family inet;}}}}

Correct Answer: D

QUESTION 3

Which two platforms are supported in both physical and virtual form factors? (Choose two.)

A. NFX Series

B. MX Series

C. SRX Series

D. ACX Series

Correct Answer: BC

QUESTION 4

Which CIDR notation is the equivalent of the subnet mask of 255.255.192.0?

A. /18

B. /19

C. /17

D. /20

Correct Answer: A

QUESTION 5

```
user@router> monitor traffic interface et-0/0/1.0 matching arp count 10
```

Referring to the exhibit, which parameter at the end of the command would provide information for troubleshooting purposes?

A. no-timestamp

B. extensive

C. print-ascii

D. no-resolve

Correct Answer: B

QUESTION 6

A BGP route does not match any term within a routing policy applied to BGP. Which action is taken by the router for this route?

A. It discards the route by the implicit `discard all\\' at the end of the policy.

B. It advertises the route according to BGP rules.

C. It discards the route by the default routing protocols policy.

D. It discards the route because it is unable to match the route to a configured action.

Correct Answer: B

QUESTION 7

You are connected to your Junos device using an SSH connection to the fxp0 interface. No other interfaces are currently configured beyond their default settings. You commit a configuration that makes the fxp0 interface unreachable from your management network.

In this scenario, how would you re-establish communication with the device?

A. Connect to the console of the device.

B. Establish an SSH connection to the loopback interface.

C. Power off and power on the device.

D. Unplug the network cable and plug it back in.

Correct Answer: A

QUESTION 8

What are three benefits of using IPv6? (Choose three.)

A. IPv6 supports a greater level of security by integrating features that were optional add- ons in IPv4.

B. IPv6 reduces administrative overhead using stateless address autoconfiguration for hosts.

C. IPv6 eliminates the need for private to public NAT using a large address pool.

D. IPv6 provides backward compatibility with IPv4 using the Next Header field.

E. IPv6 represents large IP addresses using dotted decimal notation.

Correct Answer: ABC

QUESTION 9

Which three protocols are connectionless? (Choose three.)

A. DNS

B. TFTP

C. ICMP

D. SSH

E. Telnet

Correct Answer: ABC
