QUESTION 1

The following statement describes the relationship between the Service Reusability principle and which other design principle? "Because of the potentially high performance and concurrent usage demands of reusable services, the extent of control they can exercise over their underlying environment is an important design consideration in guaranteeing an acceptable level of predictable runtime behavior." Select the correct answer.

A. Standardized Service Contract

B. Service Abstraction

C. Service Autonomy

D. Service Loose Coupling

Correct Answer: C

QUESTION 2

Which of the following statements describes service re-composability, as it relates to the Service Composability principle? Select the correct answer.

A. I have a service that is part of a service composition.

B. I have a service composition with 5 services.

C. I have a service that is part of 2 service compositions.

D. I have 2 service compositions that are part of 2 service inventories.

Correct Answer: C

QUESTION 3

The composition controller role is most associated with which of the following service models? Select the correct answer.

A. task service

B. entity service

C. utility service

D. data service

Correct Answer: A

QUESTION 4

Which of the following statements reveal common misunderstandings about service-orientation and SOA? SELECT ALL THAT APPLY

A. In order for an enterprise to be successful with SOA, enterprise-wide standardization is required.

B. Service-orientation is a revolutionary paradigm that is incompatible with existing paradigms and practices.

C. Adoption of service-orientation will return an immediate ROI due to its focus on tactical (short- term) requirements fulfillment.

D. In order for an enterprise to be successful with SOA, an understanding of service- orientation is required.

Correct Answer: ABC

QUESTION 5

A service cannot enter the role of composition sub-controller when invoked by a composition initiator. Select the correct answer.

A. True

B. False

Correct Answer: A
