QUESTION 1

The following is an example of a user story: s a hiring manager, I need a web form to enter results of my interview with the candidate. If I decided not to hire the candidate, I need to email the? s a hiring manager, I need a web form to enter results of my interview with the candidate. If I decided not to hire the candidate, I need to email the recruiter so that he/she can call the candidate. If I decided to hire the candidate, I need to open an MS Word template and draft an offer for employment? What feedback should the program manager give on the user story?

- A. It is a poorly written user story because it specifies implementation details.
- B. It is poorly written user story because it documents what the user needs to do.
- C. It is a good user story because it leaves out all implementation details as to how the work will actually get done.
- D. It is a good user story because it maintains a clear definition of what the hiring manager needs to accomplish and why.

Correct Answer: A

QUESTION 2

It is discovered while running Playback 0 that an important but not strictly necessary sub- process was missed in the analysis. How should the program manager recommend handling the missed sub-process?

- A. Redo Playback 0 and include the sub process.
- B. Note the sub-process as a user story and save it for the next release.
- C. Include the sub-process in Playback 1 without validating with the process owner.
- D. Schedule a special iteration and playback to address the sub-process after Playback 3.

Correct Answer: B

QUESTION 3

The business requirements for the BPM platform dictate that the runtime environment supports up to 10,000 unique users with up to 2,000 concurrent users during an 18 hour daily usage window with response times for user actions of less than 6 seconds in 95% of cases and no more than 10 seconds in any case. Who is responsible for ensuring that this expectation is met?

- A. BPM Analyst
- B. BPM Developer
- C. BPM Administrator
- D. BPM Program Manager

Correct Answer: C

QUESTION 4

Within a business process application, access to business data in other systems is accomplished via:

- A. tracking points
- B. integration service.
- C. exposed process variables.
- D. connection lines between Business ProcessDefinition (BPD) activities.

Correct Answer: B

QUESTION 5

The BPM program manager is scheduling Playback 1 for a process application for organizing events. Which of the following parties can be absent during Playback 1?

- A. Process Owner
- B. BPM Developer
- C. Event Organizer
- D. System Architect

Correct Answer: D
