QUESTION 1

The firmware on the p690 system needs to be updated. The machine is configured in LPAR mode. Which of the following recommended tasks needs to be performed by the service representative to update the firmware?

A. Shut down all partitions and restart system in SMP mode. Update firmware from the SMS menu.

B. Shut down one partition at a time and update that partition only.

C. Enable Set Service Authority for a partition and load firmware in that LPAR.

D. Shut down partitions that do not have service authority set and load firmware from the partition that has service authority set.

Correct Answer: D

QUESTION 2

When deleting a partition profile, which of the following statements is true?

A. A profile can only be deleted when the partition is in the Ready state.

B. A profile can only be deleted when it is not a default profile.

C. Multiple profiles cannot be deleted at one time if they belong to the same partition.

D. Profiles cannot be deleted if they are part of the system profile.

Correct Answer: B

QUESTION 3

A customer has applications running on AIX 5.1 and 5.2. They would like the ability to dynamically move resources between partitions. Which rule best describes the dynamic LPAR capabilities of the 670/690 systems?

A. Dynamic partitioning is supported on AIX 5.2

B. Dynamic partitioning is supported on AIX 5.1 and AIX 5.2

C. Dynamic partitioning is supported on AIX 5.2 for memory and I/O adapters only

D. Dynamic partitioning is supported on AIX 5.1 with the latest updates and AIX 5.2

Correct Answer: A

QUESTION 4

What task must be done immediately before upgrading the software on the HMC to save the system preferences?

A. Save upgrade data

B. Back up critical console data

C. Back up system profiles to diskette

D. Save system preferences from CEC properties

Correct Answer: A

QUESTION 5

The High Performance Computing (HPC) model of the p690 has fewer CPUs per MCM than the Turbo model. Which types of applications will benefit from the HPC?

A. Applications that are constrained by CPU speed

B. Applications that are constrained by memory size

C. Applications that are constrained by I/O bandwidth

D. Applications that are constrained by memory access speed

Correct Answer: D
