QUESTION 1

When planning for LPAR installation from CD-ROM, which of the following options must be considered?

A. Only external CD-ROMs may be used for partition installation. Assign an additional SCSI card into an empty PCI slot in each LPAR.

B. Use the media drawer CD-ROM for installing two partitions requires dynamically reassigning devices between partitions or bringing the partitions down.

C. Use the dual port SCSI card for installing two partitions. Attach one port to the front of the drawer and one port to the back of the drawer.

D. Up to four CD-ROMs can be installed in the media drawer. Each can be assigned to a separate active partition by dynamically reassigning devices between partitions or bringing the partitions down.

Correct Answer: B

QUESTION 2

Due to physical access requirements, a customer has determined the HMC must be moved to a secure location that exceeds the 15 meter limit by 200 meters. What is the only supported method to provide this extended distance connection?

A. Use the current 8-port Async adapter and replace the 15 meter cable with a compatible OEM cable of the required length.

B. Replace the 8-port Async adapter and 15 meter cable with the 128-port Async adapter and compatible OEM RS422 cable of the required length.

C. Replace the 8-port Async adapter with the 128-Port Async adapter, compatible OEM RS422 cable of the required length, Remote Async Node (RAN), and RJ45 to DB25 converter cable.

D. Replace the 8-port Async adapter and 15 meter cable with the 128-Port Async adapter, Remote Async Node (RAN), RJ45 to DB25 converter cable, and compatible OEM RS422 cable of the required length.

Correct Answer: C

QUESTION 3

On a partitioned p690 system, there is 14GB of unused memory. In the profile, the desired amount of memory is set to 16GB and the minimum amount of memory required is set to 12GB. How much memory will this partition be given when it is activated?

A. The partition will be assigned 12GB of memory.

B. The partition will not start because 16GB of memory is not available.

C. The partition will be assigned 14GB of memory.

D. The amount of memory assigned to the partition will depend on the next partition scheduled to be activated.

Correct Answer: C

QUESTION 4

A customer has four p690 systems that need to be managed from a single HMC. Which additional hardware needs to be configured on the HMC to manage the multiple p690 systems?

A. HMC cables

B. LAN adapter

C. RS/232 cables

D. Asynchronous adapter

Correct Answer: D

QUESTION 5

Alternate-disk-install rootvg cloning is one method of installing AIX 5.1 in a partition. Which of the following is an advantage of this installation method?

A. There are SMIT panels to guide one through the initial process.

B. The network parameters will be automatically updated for the new partition.

C. There is a special install option supported on the HMC for Alt-Disk-Install.

D. The original partition does not have to be disabled when starting the new partition.

Correct Answer: A
