QUESTION 1

If an RSA Archer user cannot see an application that does not exist within the system, what should the administrator check first?

A. The administrator should verify the user has been assigned a role that grants access to the application

B. The administrator should verify the user has been granted access rights to Private fields within the application

C. The administrator should confirm the user is named within a Record Permission field within the application

D. The administrator should verify the user belongs to at least one group

Correct Answer: A

QUESTION 2

When building an application, why might you use a tab set?

A. To group related fields using custom HTML code

B. To better organize History Log data

C. To group related fields for administrative purposes only

D. To group related fields into logical arrangements

Correct Answer: C

QUESTION 3

If a History Log field is deleted from an application, what will happen to the data stored within that History Log field?

A. All data previously stored in that field is deleted

B. All data previously stored in that field is still maintained by the database

C. The user data stored within that field is saved, but all other data is deleted

D. Nothing; it is not possible to delete a History Log field once it has been populated within a single record

Correct Answer: A

QUESTION 4
