QUESTION 1

Your OES NetWare server is experiencing problems during startup. You suspect the problem lies with a command in the AUTOEXEC.NCF file. You want to boot the server without processing the AUTOEXEC.NCF file.

Which command can be entered from the DOS prompt to start the operating system without executing AUTOEXEC.NCF?

- A. SERVER
- B. SERVER -S
- C. SERVER -NA
- D. SERVER -NS
- E. SERVER -NOAUTO

Correct Answer: C

QUESTION 2

Your organization has hired an additional network administrator to manage user accounts in your eDirectory tree. She won't be allowed to perform any other administration tasks. You need to configure a custom iManager role for her. Click the iManager option you would use to do this.

Correct Answer: Deskicon

QUESTION 3

You plan to install OES NetWare into an existing eDirectory tree that already has NetWare 5.1 servers in it. Which is the minimum Support Pack that must be installed on the NetWare 5.1 servers before you can install an OES NetWare server into the tree?

- A. Support Pack 5
- B. Support Pack 6
- C. Support Pack 7
- D. Support Pack 8

Correct Answer: D

QUESTION 4

You're implementing OES NetWare for a small business client: Jessica's Bakery. There is only one server in the network. You've named the server BAKERY1 and installed it into an eDirectory tree named JESSICASBAKERY-TREE. You've

used a random password generator to create a password for the tree's Admin user.

You've placed the server hardware next to the point-of-sale system in the customer area of the bakery. All workstations have the latest Novell Client installed on them. You created a directory named SHARED on the server's DATA volume

where employees can share files. Does this configuration meet Novell's security recommendations?

- A. Yes, all Novell Security guidelines have been met.
- B. No, you shouldn't use shared directories.
- C. No, the server should be located in a locked room.
- D. No, passwords created with a random password generator aren't complex enough.
- E. No, you shouldn't use the business name in the server or eDirectory tree names.

Correct Answer: C

QUESTION 5

Click the Exhibit button to begin.

You need to configure a special purpose thermal-transfer printer for your organization. Because it doesn't have a built-in network interface, you've connected it to LPT1 on your DA2 server using a parallel cable. The Printer Agents for your organization's printers are managed by an iPrint Manager and Broker on your DA1 server. You want to configure the iPrint Manager on DA1 to manage this new printer as well. Will this configuration work?

- A. Yes, all iPrint requirements have been met.
- B. No, iPrint isn't compatible with thermal printers.
- C. No, the Broker and the Manager can't reside on the same server.

D. No, iPrint can't manage a printer connected to an LPT port on a server.

E. No, locally-connected printers must have the Manager loaded on the local server.

Correct Answer: E
