QUESTION 1

You've made several changes to your OES NetWare server's AUTOEXEC.NCF file. You need to reload the operating system to put those changes into effect. Click the Remote Manager option you would use to do this.

Correct Answer: Down/Restart

QUESTION 2

Which server console command can be used to disable the loading of NLMs from the floppy drive?

- A. SECURE LOAD
- B. DISABLE LOAD
- C. SECURE FLOPPY
- D. SECURE CONSOLE
- E. DISABLE FLOPPY
- F. DISABLE CONSOLE

Correct Answer: D

QUESTION 3

Your company has recently hired a number of new technical support engineers. These employees will need access to knowledgebase documents stored on an OES NetWare server volume. They will also need to be able to create new

documents and edit existing documents. All the documents will be saved within the KNOWLEDGE directory structure on the SUPPORT volume.

Rather than assign file system rights to each individual user object, to which objects could you assign rights to make the process more manageable? (Choose 2.)

- A. Group objects
- B. Alias objects
- C. Server objects
- D. Template objects
- E. Directory Map objects
- F. Organizational Unit objects

G. Organizational Role objects

Correct Answer: AF

QUESTION 4

As a system administrator, you have a special directory containing important information that you need to remember. However, you don't want anyone to be able to see this file in the file system, even if they manage to authenticate as Admin. Which directory attribute could you use to accomplish this?

- A. H
- B. P
- C. Di
- D. Ic
- E. Ri
- F. Sy

Correct Answer: A

QUESTION 5

Which are features of an iPrint controlled access printer? (Choose 2.)

- A. Requires minimal administrative action.
- B. Is not bound by eDirectory security rules.
- C. Represented by an object in the eDirectory tree.
- D. Available only to users who have rights to use it.
- E. Immediately accessible upon creation by all users in the network.

Correct Answer: CD
