QUESTION 3

You\'re implementing OES NetWare for a small business client: Jessica\'s Bakery. There is only one server in the network. You\'ve named the server BAKERY1 and installed it into an eDirectory tree named JESSICASBAKERY-TREE. You\'ve

used a random password generator to create a password for the tree\'s Admin user.

You\'ve placed the server hardware next to the point-of-sale system in the customer area of the bakery. All workstations have the latest Novell Client installed on them. You created a directory named SHARED on the server\'s DATA volume

where employees can share files. Does this configuration meet Novell\'s security recommendations?

A. Yes, all Novell Security guidelines have been met.

B. No, you shouldn\'t use shared directories.

C. No, the server should be located in a locked room.

D. No, passwords created with a random password generator aren\'t complex enough.

E. No, you shouldn\'t use the business name in the server or eDirectory tree names.

Correct Answer: C
