### QUESTION 1

You have noticed that a server is not listed in the Servers tab on the driver or driver set. Which may resolve this issue?

- A. Revert back to an older driver.
- B. Revert back to an older driver set.
- C. Delete the problem driver and reinstall it.
- D. Delete the related driver set and then reinstall it.
- E. Disassociate the driver set object and the server and then re-associate them.

Correct Answer: E

---

### QUESTION 2

In the Navigation Access Permissions page, who has access to the administration tab? (Choose 2.)

- A. Security Administrator
- B. Resource Administrator C. Compliance Administrator
- D. Provisioning Administrator
- E. Configuration Administrator

Correct Answer: AE

---

### QUESTION 3

What role does NMAS play in synchronizing passwords in an Identity Manager solution?

- A. NMAS controls the flow of synchronizing passwords within Identity Vault.
- B. NMAS controls the flow of password synchronization in a connected system, based on NMAS driver settings.
- C. NMAS prevents legacy utilities that are not Universal Password-enabled from updating an NDS password directly.
- D. NMAS controls the flow of password synchronization, and prevents legacy utilities that are not Universal Password-enabled from updating a password directly.
- E. NMAS controls the flow of password synchronization in a connected system, and prevents legacy utilities that are not Universal Password-enabled from updating an NDS password directly.

Correct Answer: A

---

### QUESTION 4

Which statements about filters are true? (Choose 2.)

- A. You cannot export a filter from a driver.
- B. You can configure a filter policy for a driver set.
- C. You can add a class or attribute to a filter policy.
- D. There are separate filter policies for the Publisher and the Subscriber channels.
- E. The same filter policy is used for both the Publisher and the Subscriber channels.

Correct Answer: CE

---

#### QUESTION 5

When you install Active Directory drivers, you must choose an authentication method. Authentication identifies the driver shim to Active Directory and, potentially, to the local machine. Which statements are true regarding the Negotiate authentication method? (Choose 2.)

- A. This is the preferred authentication method.
- B. This can be installed on a server that is not a member of the domain.
- C. This uses Kerberos, NTLM, or a pluggable authentication scheme if one is installed.
- D. This is used when the server hosting the driver shim is not a member of the domain.
- E. When using this, some provisioning services, such as Exchange mailbox provisioning and password synchronization, are unavailable.

Correct Answer: AC
