QUESTION 1

Which statements are true about Provisioning Request Definitions? (Choose 2.)

A. They are used to launch attestation workflows.

B. They are used to grant or revoke corporate roles.

C. They are used to provide policy rules.

D. They are used to filter requests at the driver level.

E. They are used to define Global Configuration Values.

Correct Answer: AB

QUESTION 2

In the Standard SoD Constraint Exception Approval Workflow Activity, which Activity Name determines whether the approval is a quorum condition?

A. Localize SoD Name

B. Approve SoD Conflict

C. Check for Processing Type

D. Approve SoD Conflict (Serial)

E. Approve SoD Conflict (Quorum)

Correct Answer: C

QUESTION 3

When you install Active Directory drivers, you must choose an authentication method. Authentication identifies the driver shim to Active Directory and, potentially, to the local machine. Which statements are true regarding the Negotiate authentication method? (Choose 2.)

A. This is the preferred authentication method.

B. This can be installed on a server that is not a member of the domain.

C. This uses Kerberos, NTLM, or a pluggable authentication scheme if one is installed.

D. This is used when the server hosting the driver shim is not a member of the domain.

E. When using this, some provisioning services, such as Exchange mailbox provisioning and password synchronization, are unavailable.

Correct Answer: AC

QUESTION 4

In an Active Directory environment, which tools enable you to view and manage the associations between drivers and objects? (Choose 2.)

A. Designer

B. Driver Inspector

C. Object Inspector

D. Policy Simulator

E. Active Directory Discovery tool

Correct Answer: BC

QUESTION 5

When using Designer, which modeling mode is used to do all low-level operations with driver sets, drivers, policies and applications?

A. Table Mode

B. System Mode

C. DataFlow Mode

D. Architect Mode

E. Developer Mode

Correct Answer: E
