QUESTION 1

What is the largest size of LUN that is usable by a Windows client when using Isilon iSCSI? (Choose 1)

- A. 16 TB
- B. 32 TB
- C. 64 TB
- D. 128 TB

Correct Answer: B

QUESTION 2

You have a cluster that has three disk pools and has global namespace acceleration (GNA) enabled. How can you configure which disk pools benefit from GNA? (Choose 1)

- A. You can't. GNA is enabled for all disk pools and is cannot be configured beyond that.
- B. You do not need any additional configuration. GNA is only applied to a single disk pool within a cluster.
- C. You can configure the SSD strategies settings to avoid one or more disk pools.
- D. Before you enable GNA, you can select to which disk pool GNA settings apply.

Correct Answer: C

QUESTION 3

When configuring default File Pool Policy settings, selecting Same as data pool when specifying the Snapshot pool allows you to: (Choose 1)

- A. Assign snapshots to disk pools according to the same settings that are configured for data pools.
- B. Assign snapshots to file pools according to the same settings that are configured for data pools.
- C. Assign snapshot pools for file pool use.
- D. Assign filtered files to snapshot pools without restriction.

Correct Answer: A

QUESTION 4

When should you run an OVT check? (Choose 1) A. Never. Only Isilon Support runs OVT checks.

- B. After a production cluster is experiencing performance issues

C. After a hard disk is replaced on a cluster.

D. Before a newly created cluster is connected to the production network.

Correct Answer: D

QUESTION 5
