QUESTION 1

Source:	Any
Destination:	web_public_IP
Service:	Any
Translated Source:	original
Translated Destination:	web_private_IP
Service:	original

You just installed a

new Web server in the DMZ that must be reachable from the Internet. You create a manual Static NAT rule as follows:

"web_public_IP" is the node object that represents the new Web server\\'s public IP address. "web_private_IP" is the node object that represents the new Web site\\'s private IP address. You enable all settings from Global Properties > NAT.

When you try to browse the Web server from the Internet you see the error "page cannot be displayed". Which of the following is NOT a possible reason?

A. There is no route defined on the Security Gateway for the public IP address to the Web server\\'s private IP address.

B. There is no ARP table entry for the protected Web server\\'s public IP address.

C. There is no Security Policy defined that allows HTTP traffic to the protected Web server.

D. There is no NAT rule translating the source IP address of packets coming from the protected Web server.

Correct Answer: D

QUESTION 2

Your network is experiencing connectivity problems and you want to verify if routing problems are present. You need to disable the firewall process but still allow routing to pass through the Gateway running on an IP Appliance running IPSO. What command do you need to run after stopping the firewall service?

A. ipsofwd on admin

B. ipsofwd slowpath

C. fw fwd routing

D. fw load routed

Correct Answer: A

QUESTION 3

You install and deploy GAiA with default settings. You allow Visitor Mode in the Gateway object\\'s Remote Access properties and install policy; but SecureClient refuses to connect. What is the cause of this?

A. Set Visitor Mode in Policy > Global Properties > Remote-Access > VPN - Advanced.

B. Office mode is not configured.

C. You need to start SSL Network Extender first, then use Visitor Mode.

D. The WebUI on GAiA runs on port 443 (HTTPS). When you configure Visitor Mode it cannot bind to default port 443, because it\\'s used by another program (WebUI). You need to change the WebUI port, or run Visitor Mode on a different port.

Correct Answer: D

QUESTION 4

You are using SmartView Tracker to troubleshoot NAT entries. Which column do you check to view the NAT\\'d source port if you are using Source NAT?
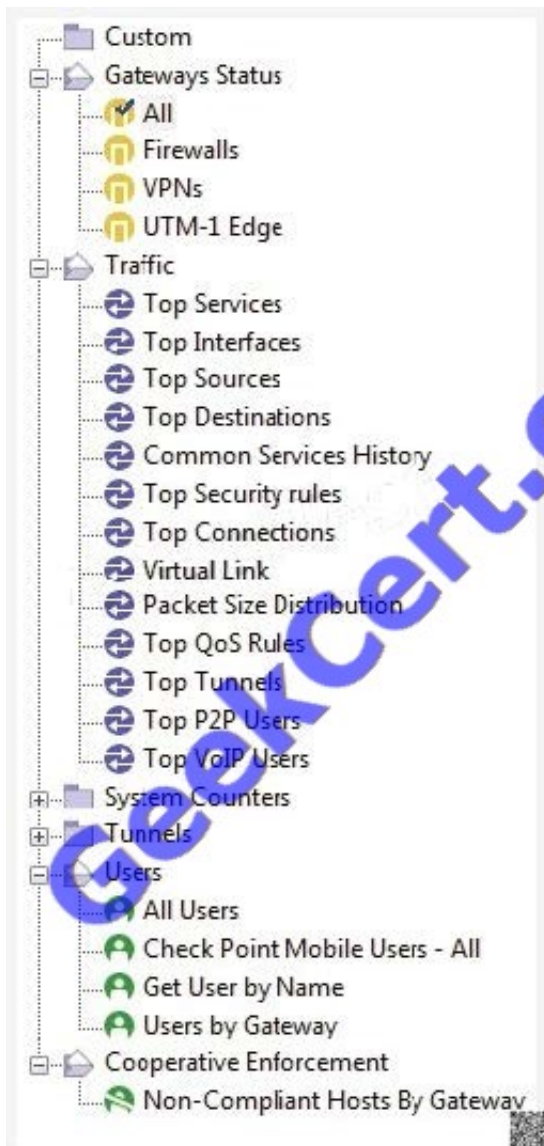

A. XlateDPort

B. XlateSrc

C. XlateDst

D. XlateSPort

Correct Answer: D

QUESTION 5

You have just installed your Gateway and want to analyze the packet size distribution of your traffic with SmartView Monitor.

Unfortunately, you get the message.

- Custom
