### QUESTION 1

What is the difference between Standard and Specific Sign On methods?

- A. Standard Sign On allows the user to be automatically authorized for all services that the rule allows, but re-authenticate for each host to which he is trying to connect. Specific Sign On requires that the user re-authenticate for each service.
- B. Standard Sign On requires the user to re-authenticate for each service and each host to which he is trying to connect. Specific Sign On allows the user to sign on only to a specific IP address.
- C. Standard Sign On allows the user to be automatically authorized for all services that the rule allows. Specific Sign On requires that the user re-authenticate for each service and each host to which he is trying to connect.
- D. Standard Sign On allows the user to be automatically authorized for all services that the rule allows. Specific Sign On requires that the user re-authenticate for each service specifically defined in the window Specific Action Properties.

Correct Answer: C

---

### QUESTION 2
