QUESTION 1

An advantage of using central instead of local licensing is:

- A. A license can be taken from one Security Management server and given to another Security Management Server.
- B. Only one IP address is used for all licenses.
- C. Licenses are automatically attached to their respective Security Gateways.
- D. The license must be renewed when changing the IP address of security Gateway. Each module's license has a unique IP address.

Correct Answer: B

QUESTION 2

You have two rules, ten users, and two user groups in a Security Policy. You create database version 1 for this configuration. You then delete two existing users and add a new user group. You modify one rule and add two new rules to the Rule Base. You save the Security Policy and create database version 2. After awhile, you decide to roll back to version 1 to use the Rule Base, but you want to keep your user database. How can you do this?

- A. Run `fwm_dbexport` to export the user database. Select restore the entire database in the Database Revision screen. Then, run `fwm_dbimport`.
- B. Restore the entire database, except the user database, and then create the new user and user group.
- C. Restore the entire database, except the user database.
- D. Run `fwm dbexport -l filename`. Restore the database. Then, run `fwm dbimport -l filename` to import the users.

Correct Answer: C

QUESTION 3

How can you view `cpinfo` on a SecurePlatform machine?

- A. `tcpdump`
- B. `snoop i`
- C. `infotab`
- D. Text editor, such as `vi`

Correct Answer: D

QUESTION 4

SmartView Tracker R75 consists of three different modes. They are:

- A. Log, Active, and Audit
- B. Log, Active, and Management
- C. Log, Track, and Management
- D. Network and Endpoint, Active, and Management

Correct Answer: D

QUESTION 5
