### QUESTION 1

What is Identity Sharing?

- A. Management servers can acquire and share identities with Security Gateways
- B. Users can share identities with other users
- C. Security Gateways can acquire and share identities with other Security Gateways
- D. Administrators can share identifies with other administrators

Correct Answer: C

Identity Sharing Best Practice - In environments that use many Security Gateways and AD Query, we recommend that you set only one Security Gateway to acquire identities from a given Active Directory domain controller for each physical site. If more than one Security Gateway gets identities from the same AD server, the AD server can become overloaded with WMI queries. Set these options on the Identity Awareness > Identity Sharing page of the Security Gateway object:

1.

One Security Gateway to share identities with other Security Gateways. This is the Security Gateway that gets identities from a given domain controller.

2.

All other Security Gateways to get identities from the Security Gateway that acquires identities from the given domain controller.

### QUESTION 3

Which two of these Check Point Protocols are used by \_\_\_\_\_ ?

- A. ELA and CPD
- B. FWD and LEA
- C. FWD and CPLOG
- D. ELA and CPLOG

Correct Answer: B

---

### QUESTION 4

In R80 Management, apart from using SmartConsole, objects or rules can also be modified using:

- A. 3rd Party integration of CLI and API for Gateways prior to R80.
- B. A complete CLI and API interface using SSH and custom CPCode integration.
- C. 3rd Party integration of CLI and API for Management prior to R80.
- D. A complete CLI and API interface for Management with 3rd Party integration.

Correct Answer: B

---

### QUESTION 5

How do you configure the Security Policy to provide users access to the Captive Portal through an external (Internet) interface?

- A. Change the gateway settings to allow Captive Portal access via an external interface.
- B. No action is necessary. This access is available by default.
- C. Change the Identity Awareness settings under Global Properties to allow Captive Policy access on all interfaces.
- D. Change the Identity Awareness settings under Global Properties to allow Captive Policy access for an external interface.

Correct Answer: A
