QUESTION 1

Which Threat Prevention Software Blade provides protection from malicious software that can infect your network computers?

- A. Anti-Malware
- B. IPS
- C. Anti-bot
- D. Anti-Spam

Correct Answer: C

Anti-Bot The Need for Anti-Bot There are two emerging trends in today's threat landscape:

1.

A profit-driven cybercrime industry that uses different tools to meet its goals. This industry includes cyber-criminals, malware operators, tool providers, coders, and affiliate programs. Their "products" can be easily ordered online from numerous sites (for example, do-it-yourself malware kits, spam sending, data theft, and denial of service attacks) and organizations are finding it difficult to fight off these attacks.

2.

Ideological and state driven attacks that target people or organizations to promote a political cause or carry out a cyber-warfare campaign.

Both of these trends are driven by bot attacks.

A bot is malicious software that can invade your computer. There are many infection methods. These include opening attachments that exploit a vulnerability and accessing a web site that results in a malicious download.

QUESTION 2

How is communication between different Check Point components secured in R80? As with all questions, select the best answer.

- A. By using IPSEC
- B. By using SIC
- C. By using ICA

D. By using 3DES

Correct Answer: B

QUESTION 3

The SIC Status "Unknown" means

- A. There is connection between the gateway and Security Management Server but it is not trusted.
- B. The secure communication is established.
- C. There is no connection between the gateway and Security Management Server.
- D. The Security Management Server can contact the gateway, but cannot establish SIC.

Correct Answer: C

SIC Status

After the gateway receives the certificate issued by the ICA, the SIC status shows if the Security Management Server can communicate securely with this gateway:

Communicating - The secure communication is established.

Unknown - There is no connection between the gateway and Security Management Server.

Not Communicating - The Security Management Server can contact the gateway, but cannot establish SIC. A message shows more information. Reference: https://sc1.checkpoint.com/documents/R80/CP_R80_SecMGMT/html_frameset.htm?topic=documents/R80/CP_R80_SecMGMT/125443

QUESTION 4

What SmartEvent component creates events?

- A. Consolidation Policy
- B. Correlation Unit
- C. SmartEvent Policy
- D. SmartEvent GUI

Correct Answer: B

QUESTION 5

Packages and licenses are loaded from all of these sources EXCEPT

- A. Download Center Web site
- B. UserUpdate
- C. User Center
