QUESTION 1

When you check Web Server in a host-node object, what happens to the host?

- A. The Web server daemon is enabled on the host.
- B. More granular controls are added to the host, in addition to Web Intelligence tab settings.
- C. You can specify allowed ports in the Web server's node-object properties. You then do not need to list all allowed ports in the Rule Base.
- D. IPS Web Intelligence is enabled to check on the host.

Correct Answer: B

QUESTION 2

What process is responsible for transferring the policy file from Smart Center to the Gateway?

- A. FWD
- B. FWM
- C. CPRID
- D. CPD

Correct Answer: D

QUESTION 3

When configuring a Web Application for SSL VPN remote access, you have given the following definition for the application along with its protection level.

Name	DNS Name or Host IP	Directories	Services	Endpoint Compliance Profile
Example	*.example.com	/intranet/	HTTP, HTTPS	Permissive

Which of the following is the best match for the above application?

- A. dmz.example.com/extranet
- B. www.dmz.example.com/extranet
- C. www.example.com/intranet
- D. hr.dmz.example.com/intranet

Correct Answer: C

QUESTION 4

Which of the following statements is TRUE concerning MEP VPN's?

- A. The VPN Client is assigned a Security Gateway to connect to based on a priority list, should the first connection fail.
- B. MEP Security Gateways can be managed by separate Management Servers.
- C. MEP VPN's are restricted to the location of the gateways.
- D. State synchronization between Security Gateways is required.

Correct Answer: B

QUESTION 5

What is the behavior of ClusterXL in a High Availability environment?

- A. Both members respond to the virtual IP address, and both members pass traffic when using their physical addresses.
- B. Both members respond to the virtual IP address, but only the active member is able to pass traffic.
- C. The active member responds to the virtual IP address and both members pass traffic when using their physical addresses.
- D. The active member responds to the virtual IP address and is the only member that passes traffic.
- E. The passive member responds to the virtual IP address, and both members route traffic when using their physical addresses.

Correct Answer: D
