QUESTION 1

Matt wants to upgrade his old Security Management server to R81.x using the Advanced Upgrade with Database Migration. What is one of the requirements for a successful upgrade?

- A. Size of the /var/log folder of the source machine must be at least 25% of the size of the /var/log directory on the target machine
- B. Size of the /var/log folder of the target machine must be at least 25% of the size of the /var/log directory on the source machine
- C. Size of the \$FWDIR/log folder of the target machine must be at least 30% of the size of the \$FWDIR/log directory on the source machine
- D. Size of the /var/log folder of the target machine must be at least 25GB or more

Correct Answer: B

https://sc1.checkpoint.com/documents/R77/CP_R77_Gaia_Installation_and_Upgrade_Guide/html_frameset.htm?topic=documents/R77/CP_R77_Gaia_Installation_and_Upgrade_Guide/90083

QUESTION 2

If there are two administration logged in at the same time to the SmartConsole, and there are objects locked for editing, what must be done to make them available to other administrators? (Choose the BEST answer.)

- A. Publish or discard the session.
- B. Revert the session.
- C. Save and install the Policy.
- D. Delete older versions of database.

Correct Answer: A

QUESTION 3

Check Point Management (cpm) is the main management process in that it provides the architecture for a consolidated management console. It empowers the migration from legacy Client-side logic to Server-side logic. The cpm process:

- A. Allow GUI Client and management server to communicate via TCP Port 19001
- B. Allow GUI Client and management server to communicate via TCP Port 18191
- C. Performs database tasks such as creating, deleting, and modifying objects and compiling policy.
- D. Performs database tasks such as creating, deleting, and modifying objects and compiling as well as policy code generation.

Correct Answer: C

QUESTION 4

You want to allow your Mobile Access Users to connect to an internal file share. Adding the Mobile Application \\File Share\\ to your Access Control Policy in the SmartConsole didn't work. You will be only allowed to select Services for the \\Service and Application\\ column.

How to fix it?

- A. A Quantum Spark Appliance is selected as Installation Target for the policy packet.
- B. The Mobile Access Blade is not enabled for the Access Control Layer of the policy.
- C. The Mobile Access Policy Source under Gateway properties is set to Legacy Policy and not to Unified Access Policy.
- D. The Mobile Access Blade is not enabled under Gateway properties.

Correct Answer: C

QUESTION 5

The admin is connected via ssh to the management server. He wants to run a mgmt_cli command but got a Error 404 message. To check the listening ports on the management he runs netstat with the results shown below. What can be the cause for the issue?

```
[Expert@SMS:0]# mgmt_cli show service-tcp name FTP
Username: admin
Password:
message: "Error 404. The Management API service is not available. Please check that the Management API server is up and running."
code: "generic_error"
[Expert@SMS:0]# netstat -anp | grep http
tcp    0  0 0.0.0.0:80          0.0.0.0:*        LISTEN  18114/httpd
tcp    0  0 0.127.0.0:181      0.0.0.0:*        LISTEN  18114/httpd
tcp    0  0 0.0.0.0:4434       0.0.0.0:*        LISTEN  9019/httpd2
tcp    0  0 0.0.0.0:443        0.0.0.0:*        LISTEN  18114/httpd
```

- A. Wrong Management API Access setting for the client IP. To correct it go to SmartConsole / Management and Settings / Blades / Management API and press "Advanced Settings.." and choose GUI clients or ALL IP's.
- B. The API didn't run on the default port check it with api status and add -port 4434 to the mgmt_cli command.
- C. The management permission in the user profile is missing. Go to SmartConsole / Management and Settings / Permissions and Administrators / Permission Profiles. Select the profile of the user and enable "Management API Login" under Management Permissions.
- D. The API is not running, the services shown by netstat are the gaia services. To start the API run "api start"

Correct Answer: D
