QUESTION 1

If you open the Policy Editor for a Virtual System in your VSX configuration and change the Global Properties settings to accept ICMP requests, which of the following occurs?

- A. The settings for all Virtual Systems attached to the same Admin CMA are changed.
- B. The settings for all Virtual Systems within a Customer are changed, regardless of CMA association.
- C. No change takes place on any Policy. Global properties can only be configured in the Global Policy Editor.
- D. The settings for all Virtual Systems on the MDS are updated to reflect the change.
- E. The settings for all Virtual Systems managed by the same Customer CMA are changed.

Correct Answer: E

QUESTION 2

When deploying a VSX Gateway managed by a SmartCenter Server, which of the following statements is TRUE?

- A. VSX Administrators can configure different domains for each Virtual System.
- B. Multiple Administrators can simultaneously connect to the same database, to manage multiple Customers.
- C. All Customer objects, rules, and users are shared in a single database.
- D. Each Virtual System has its own unique Certificate Authority.
- E. VSX superuser Administrators can configure granular permissions for each Customer Administrator.

Correct Answer: C

QUESTION 3

You need to provide a security layer for an existing core network. You need an inspection module that operates at layer 2, is completely transparent, and does not impact the existing IP structure or different control protocols in use. Which of the following virtual devices will perform the kind of inspection you need?

- A. External Virtual Router
- B. Virtual Switch
- C. Virtual System in Bridge mode
- D. Virtual System
- E. Internal Virtual Router

Correct Answer: C

QUESTION 4

Bridged Virtual Systems in a cluster monitor which of the following protocols, to fail over a bridged system?

- A. VTP
- B. MPLS
- C. BPDU
- D. STP
- E. OSPF

Correct Answer: C

QUESTION 5

Which of the following statements is true concerning the default Security Policy of the External Virtual Router?

- A. The External Virtual Router performs exactly like an External Virtual Switch.
- B. All traffic emanating from networks protected by the VSX Gateway is dropped. All other traffic is accepted.
- C. All traffic passing through the External Virtual Router is allowed by default, without inspection by the External Virtual Router's Security Policy.
- D. All traffic bound for the management network is dropped.
- E. Virtual Routers do not enforce a Security Policy.

Correct Answer: C
