QUESTION 1

-- Exhibit

Web Caches:			
Index	ID	Weight	Distribution
Q 1	172.16.10.101 (inpath0_0)	25	51 (19.92%)
Q 2	172.16.11.101	100	205 (80.08%)

-- Exhibit -

Refer to the exhibit. In a WCCP environment with R3, SH10 and SH11, the following screenshot shows that the load is not being distributed evenly in between the Steelhead appliances. Why?

- A. They are different Steelhead appliances models.
- B. One of the Steelhead appliances currently has a lower number of TCP connections available.
- C. The weight setting is being used on the WCCP configuration.
- D. One of the Steelhead appliances is in admission control.

Correct Answer: C

QUESTION 2

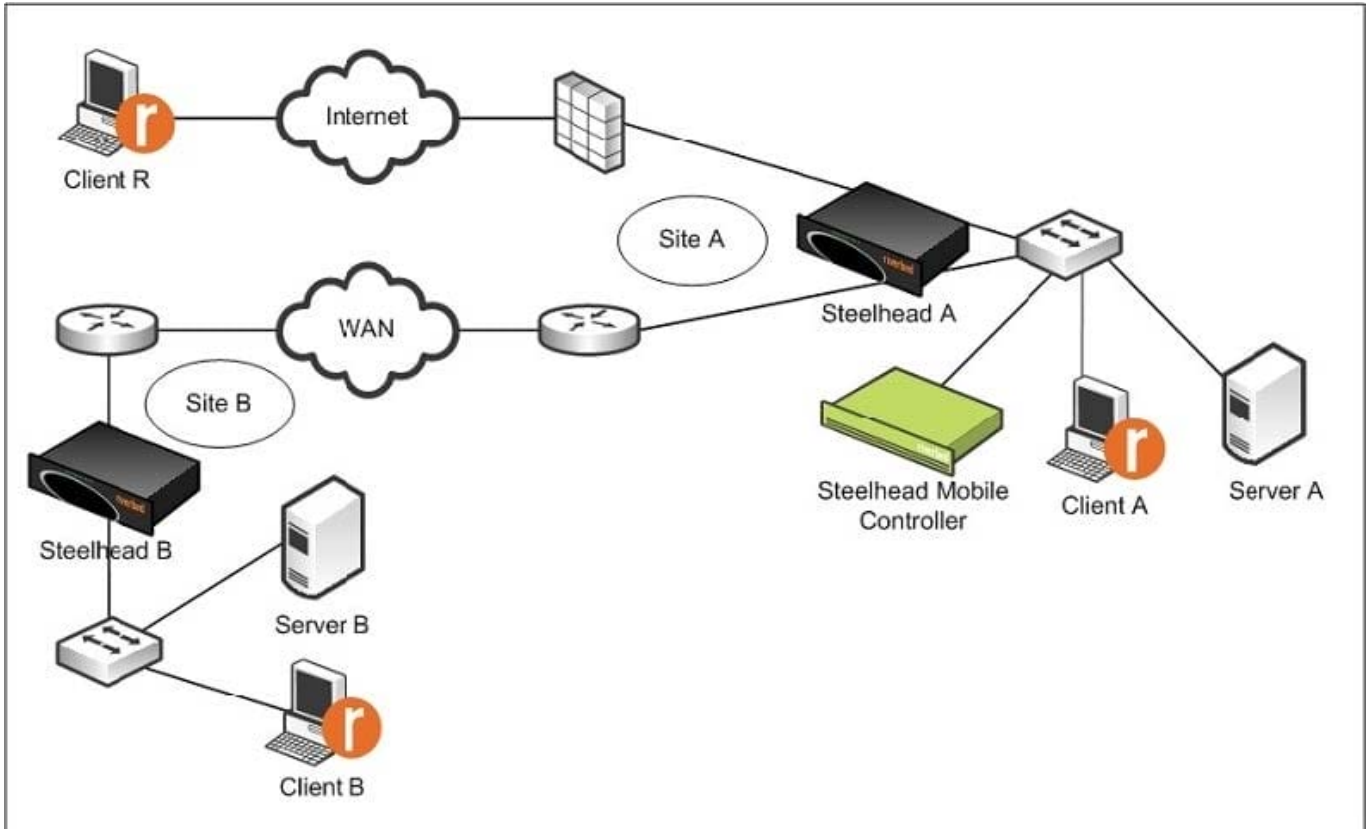

Which of the following are configurable attributes of an Interceptor appliance? (Select 3)

- A. Synchronizing datastore
- B. Sharing connection state with a parallel Interceptor appliance
- C. Redirect to a Steelhead appliance cluster
- D. Failover to another Interceptor appliance

Correct Answer: BCD

QUESTION 3

Refer to the exhibit.

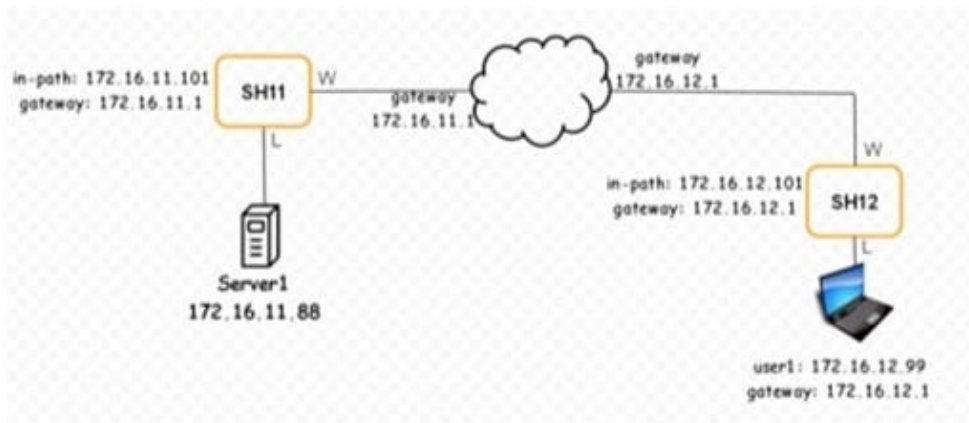

If Steelhead Mobile Client B offers up a share on the network, what is needed on Steelhead Mobile Client R to open an optimized connection to this share if enhanced auto-discovery is enabled on all Steelhead appliances?

- A. Default auto-discovery will work fine without modification
- B. The connection to Client B cannot be optimized because the Steelhead Mobile Controller cannot optimize incoming connections
- C. A fixed-target rule to Client B's IP address is needed in order for optimization to occur on Mobile Client B
- D. The addition of a peering rule

Correct Answer: A

QUESTION 4

-- Exhibit -- Exhibit -

Refer to the exhibit. When USER1 tried to access Server 1, the user sees the shown message on his Steelhead Mobile Client. What does this represent?

- A. The Steelhead Mobile client does not have enough licenses.
- B. The Steelhead Mobile client policy is configured with the "location awareness" feature.
- C. There are pass-through rules not allowing optimization.
- D. The Steelhead Mobile client did not initialize properly and needs to be reset.

Correct Answer: B

QUESTION 5

What happens to traffic when a Steelhead appliance reports admission control?

- A. Traffic will be interrupted
- B. The Steelhead stops the interception of new connections for optimization for as long as it is in admission control
- C. This is just a report and the Steelhead will continue to optimize traffic
- D. The Steelhead will start optimizing faster any new connections

E. The Steelhead will shut down in less than a minute

Correct Answer: B
