### QUESTION 1

You are creating an information security policy for your company. Which of the following activities will help you focus on creating policies for the most important resources?

- A. Auditing the firewall
- B. Implementing non-repudiation
- C. Logging users
- D. Classifying systems

Correct Answer: D

---

### QUESTION 2

You want to create a quick solution that allows you to obtain real-time login information for the administrative account on an LDAP server that you feel may become a target. Which of the following will accomplish this goal?

- A. Reinstall the LDAP service on the server so that it is updated and more secure.
- B. Install an application that creates checksums of the contents on the hard disk.
- C. Create a login script for the administrative account that records logins to a separate server.
- D. Create a dummy administrator account on the system so that a potential hacker is distracted from the real login account.

Correct Answer: C

---

### QUESTION 3

Requests for Web-based resources have become unacceptably slow. You have been assigned to implement a solution that helps solve this problem. Which of the following would you recommend?

- A. Enable stateful multi-layer inspection on the packet filter
- B. Implement caching on the network proxy server
- C. Enable authentication on the network proxy server
- D. Implement a screening router on the network DMZ

Correct Answer: B

---

### QUESTION 4

A security breach has occurred involving the company e-commerce server. Customer credit card data has been released to unauthorized third parties. Which of the following lists the appropriate parties to inform?

- A. Shareholders, law enforcement agencies and company employees
- B. Affected customers, credit card companies and law enforcement agencies
- C. The Internet Service Provider, ICANN and company shareholders
- D. External security consultants, company board members and affected customers

Correct Answer: B

---

#### QUESTION 5

Your organization has made a particularly unpopular policy decision. Your supervisor fears that a series of attacks may occur as a result. You have been assigned to increase automated auditing on a server. When fulfilling this request, which of the following resources should you audit the most aggressively?

- A. Authentication databases, including directory servers
- B. Intrusion detection systems, especially those placed on sensitive networks
- C. Log files on firewall systems
- D. Firewall settings for desktop systems

Correct Answer: A
