QUESTION 1

Which of the following is a security threat commonly associated with cloud-based services?

- A. Malware
- B. Phishing
- C. Hypervisor vulnerabilities
- D. Operating system vulnerabilities

Correct Answer: C

QUESTION 2

Patrick visits his teenage daughter's social media page and discovers several offensive posts about one of her classmates. After speaking with his daughter, Patrick learns that several other girls in her class are upset with the classmate and have been posting, texting and e-mailing others about the girl. What is the best way for Patrick to help his daughter understand cyberbullying?

- A. He should advise his daughter to ignore the posts, texts and c-mails.
- B. He should explain to his daughter that she is participating in the bullying by accepting others' posts, texts and c-mails.
- C. He should explain to his daughter that the Internet embraces freedom of speech, and anyone is allowed to write anything.
- D. He should advise his daughter to delete all the posts, texts and c-mails she has received, as well as any new ones that appear.

Correct Answer: B

QUESTION 3

Aisha is coding a Web site using a GUI HTML editor. She wants to quickly check her code for errors and compliance with HTML standards as she works. How can she best accomplish this?

- A. Render and validate the code using <http://validator.w3.org>.
- B. Render the code with a browser to see if it looks correct.
- C. Validate the code using <http://validator.w3.org>.
- D. Validate the code using the GUI Validator.

Correct Answer: D

**QUESTION 4**

Katie developed her corporation's intra net site using proprietary HTML language extensions based on the company's current browser. The company has recently updated its systems to include the use of a new browser. Now the intra net site that Katie developed no longer renders its content consistently. What should Katie do to ensure that this site's content renders consistently regardless of the browser used?

- A. Revise the site to include workarounds and hacks for the new browser.
- B. Revise the site's markup language in only those areas that are not rendering properly.
- C. Update the site using a single language standard consistently, such as HTML5 or XHTML.
- D. Update the site using the proprietary language extensions required by the new browser's rendering engine.

Correct Answer: C

QUESTION 5

Emelia and Lola have created a new software application that allows messaging site subscribers to analyze the message statistics in order to more easily assess and interact with followers. They have decided to license this software according to the GNU GPL Version 3. What does this license allow them to do with their software?

- A. They can only sell this software through a not-for-profit company.
- B. They can sell this software, but only if they make the software code available on a public server.
- C. The software enters the public domain for free use and can be altered by other programmers, who must then make their changes freely available as well.
- D. The software enters the public domain for free use, but any changes made in the future can be kept secret, allowing them to profitably sell the modified software.

Correct Answer: C
