#### QUESTION 1

An administrator is developing a workflow for a company's test and development environment and needs to run a script that will generate a work order ticket. Which VMware product provides out of the box plug-ins to assist the administrator in completing this task?

- A. vRealize Operations
- B. vRealize Orchestrator
- C. vCenter Server
- D. vCloud Connector

Correct Answer: D

---

#### QUESTION 2

An administrator has installed and configured site RecoveryManager (SRM) to protect a private cloud infrastructure, but wants assurance that the plan put in place will actually work. How can the administrator properly test the site recovery manager setup?

- A. Tell SRM to simulate moving your workloads using vcloud connector.
- B. Tell SRM to initiate an HA failover test.
- C. Tell SRM to execute a non-disruptive recovery test.
- D. Tell SRM to vMotion protected VMs to the recovery site.

Correct Answer: C

---

#### QUESTION 3

A development team needs enough control within their public cloud to develop and customize their web and database applications. However they prefer to leave all maintenance and management of the underlying servers to the service provider. Which type of services is best suited for their needs?

- A. Data processing as a Service ( DPaaS)
- B. Infrastructure as a Service ( IaaS)
- C. Platform as a Service ( PaaS)
- D. Software as a Service ( SaaS)

Correct Answer: C

---

#### QUESTION 4

Which statement best describes a Software-Defined Enterprise?

- A. An architecture framework designed to fully automate all IT services in all data centers removing the need for human interaction.
- B. An enterprise response to mainstream disorganization of resources in the data center that delivers on the promise of interconnected infrastructure and software- as a-service.
- C. An architecture that uses intelligence automation and common management to provide transparent governance of infrastructure and software-as a-service.
- D. An architecture that uses virtualization to replace all physical components in the data center while using localized management and compliance to deliver infrastructure and software-as-a-service.

Correct Answer: C

---

#### QUESTION 5

An administrator is deploying a new vApp which needs specific storage capabilities. In the past datastores were organized by service levels such as Tier 1 FC Tier 2 SAS etc. The company's storage infrastructure has grown very large and manually identifying the various storage types and capabilities has become tedious and error prone. Which technology helps eliminate a lot of the manual work involved in keeping

storage information up to date within a cloud-based environment?

- A. VASA
- B. Resource Pools
- C. Storage vMotion
- D. Catalogs

Correct Answer: C
