-  **800,000+** Satisfied Customers

### QUESTION 1

A company wants to implement a software-defined network solution with minimal impact to the existing environment. What additional hardware, if any, is required when implementing VMware NSX?

- A. A stateful inspection Firewall to take advantage of NSX's built in Firewall protection
- B. None. NSX is a completely non-disruptive solution.
- C. Special VLAN configurations for accessing NSX.
- D. At least two Layer 3 switches that must be converted to trunk mode.

Correct Answer: B

NSX is a completely non-disruptive solution which can be deployed on any IP network from any vendor ?both existing traditional networking models and next generation fabric architectures. The physical network infrastructure already in place is all that is required to deploy a software-defined data center with NSX.

### QUESTION 2

Which vSphere component provides hypervisor-based virtual machine replication and recovery?

- A. VMware Site Recovery Manager
- B. VMware vSphere Data Protection
- C. VMware vSphere Replication
- D. VMware vSAN

Correct Answer: C

VMware vSphere Replication is a hypervisor-based, asynchronous replication solution for vSphere virtual machines. It is fully integrated with VMware vCenter Server and the vSphere Web Client. vSphere Replication delivers flexible, reliable and cost-efficient replication to enable data protection and disaster recovery for all virtual machines in your environment.

### QUESTION 3

Match the Horizon 7 components with their appropriate descriptions.

Select and Place:

<u>Horizon 7 Components</u>	<u>Answer Area</u>	<u>Description</u>
Horizon Agent		Acts as a broker for client connections by authenticating and then directing incoming user requests to the appropriate virtual machine, physical system, or RDS host.
Horizon Client		A software service that is installed on all guest virtual machines, physical systems, or RDS hosts to allow them to be managed by Horizon 7.
View Connection Server		Enables administrators to configure View Connection Server, deploy desktop and application pools, manage machines, control user authentication, initiate and examine system events, and perform analytical activities.
Horizon Administrator		Communicates with View Connection Server to enable users to connect to their desktops.

Correct Answer:

<u>Horizon 7 Components</u>	<u>Answer Area</u>	<u>Description</u>
	View Connection Server	Acts as a broker for client connections by authenticating and then directing incoming user requests to the appropriate virtual machine, physical system, or RDS host.
	Horizon Agent	A software service that is installed on all guest virtual machines, physical systems, or RDS hosts to allow them to be managed by Horizon 7.
	Horizon Administrator	Enables administrators to configure View Connection Server, deploy desktop and application pools, manage machines, control user authentication, initiate and examine system events, and perform analytical activities.
	Horizon Client	Communicates with View Connection Server to enable users to connect to their desktops.

#### QUESTION 4
