QUESTION 1

A Citrix Administrator needs to change the port used for communication between StoreFront and the Delivery Controller.

Which configuration in the StoreFront Management Console should the administrator modify to meet this goal?

A. Stores

B. Beacons

C. Gateways

D. Authentication

Correct Answer: A

QUESTION 2

Which action should a Citrix Administrator take to identify the source IP addresses of external users who have accessed hosted desktops and applications in a XenDesktop site through NetScaler?

A. Configure the Auditing Syslog in the Configuration tab.

B. Download the current trace files from the Diagnostics tab.

C. Monitor the \\'Current ICA connections\\' in the Configuration tab.

D. Generate a \\'Current AAA sessions\\' report on the Reporting tab.

Correct Answer: A

QUESTION 3

Scenario: A Citrix Administrator implemented a Citrix policy to set up Citrix Profile Management. After the administrator implemented the policy, users are still being required to set up their applications each time they logon. What is preventing the existing policy from working?

A. The .INI file does NOT exist.

B. There are no filters set within the policy.

C. The path specified to save the profile is incorrect.

D. The users need to be removed from the Citrix profile group.

Correct Answer: C

QUESTION 4

Scenario: A Citrix Administrator needs to use Provisioning Services to create a vDisk from a target device that has the latest hotfixes and security updates applied. The master target device is a Windows 7 virtual machine running on XenServer.

What should the administrator do to create a new vDisk from the target device?

A. Run the Imaging Wizard on the target device.

B. Run the \'Add personal vDisk storage\' wizard in Citrix Studio.

C. Run the target device software to capture the target device hard drive.

D. Use the \'Export\' option in XenServer to create a vDisk from the target device.

Correct Answer: A

QUESTION 5

A Citrix Administrator updates a vDisk assigned to a group of pooled desktops.

Which two steps must the administrator take to ensure that the updated vDisk is associated with the pooled desktops? (Choose two.)

A. Update the vDisk\'s inventory.

B. Promote the vDisk to production.

C. Place the vDisk into private image mode.

D. Recreate the pooled desktops associated with the vDisk.

Correct Answer: AB
