### QUESTION 1

A Citrix Administrator finds that Profile Management is NOT writing .INI files back to the User Profile Store.

Which log entry type should the administrator enable in Profile Management logging to see which items are being written to the User Profile Store?

- A. File system actions
- B. Common information
- C. File system notifications
- D. Personalized user information

Correct Answer: A

---

### QUESTION 2

A Citrix Administrator plans to use Provisioning Services to provision server OS machines and desktop OS machines that boot from vDisks. Which two components are required in order to provision the machines? (Choose two.)

- A. Citrix Receiver
- B. XenServer Tools
- C. Virtual Delivery Agent
- D. Target device software

Correct Answer: CD

---

### QUESTION 3

A Citrix Administrator creates an external network in a XenServer deployment; however, virtual machines connected to the newly created external network CANNOT communicate with other devices on the same subnet as the XenServer host. The virtual machines are unable to communicate with devices on the same subnet as the XenServer host because \_\_\_\_\_ or \_\_\_\_\_. (Choose the two correct options to complete the sentence.)

- A. the virtual machines are behind a NAT router
- B. MAC filtering is enabled on the external network
- C. the link status for the external NIC is disconnected
- D. the virtual machines are on a VLAN that is configured incorrectly

---

Correct Answer: CD

---

#### QUESTION 4

Scenario: A Citrix Administrator must provide the IT manager with access to Citrix Studio to audit the infrastructure. The administrator wants to prevent the IT manager from editing configurations in Studio. Which administrator role should the administrator provide for the IT manager?

- A. Help Desk Administrator
- B. Read Only Administrator
- C. Delivery Group Administrator
- D. Machine Catalog Administrator

Correct Answer: B

---

#### QUESTION 5

Scenario: A user reports that a financial application is performing poorly. A Citrix Administrator has accessed the server OS machine load evaluator index report from Citrix Director. The administrator reviews the data for the last three months and notices that on the last three days of the month the CPU utilization is trending at 97% while memory utilization is 48%.

Based on this information, which two measures could the administrator take to improve performance of the finance application? (Choose two.)

- A. Add a vCPU to the virtual servers.
- B. Provision additional virtual servers.
- C. Add additional RAM to the virtual servers.
- D. Move the virtual servers to a higher-performance storage subsystem.

Correct Answer: AB
