QUESTION 1

Which two consoles could a Citrix Administrator use to back up a XenDesktop database? (Choose two.)

A. Citrix Studio

B. Citrix Director

C. Citrix XenCenter

D. SQL Management Studio

Correct Answer: AD

QUESTION 2

A Citrix Administrator has updated the Finance vDisk to include Microsoft Office 2013. The administrator has tested the Finance vDisk and now needs to merge all updates to the vDisk to maximize and reclaim disk space. Members of the Finance user group are expected to have access to Microsoft Office 2013 when they log on to desktops to which the Finance vDisk is assigned.

Tasks:

1.

 Merge all updates to the vDisk.

2.

 Ensure members of the Finance user group have access to Microsoft Office 2013 as stated in the scenario.

3.

 Complete the tasks that are necessary to meet the requirements outlined in the scenario.

Correct Answer: Review the steps and solution in below.

Merging Differencing Disks

Right-click on a vDisk in the Console, then select the Versions menu option. The vDisk Versions dialog appears.

Click the Merge button. The Merge dialog appears.

Select to perform a Merged Updates or Merged Base merge.

To merge all differencing disks to a single differencing disk (not to the base disk image), select the Merged Updates option.

To fully merge all differencing disks into a new base disk, select the Merged Base option.
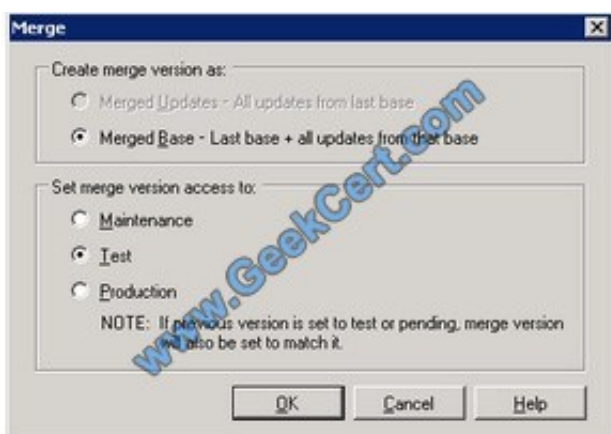

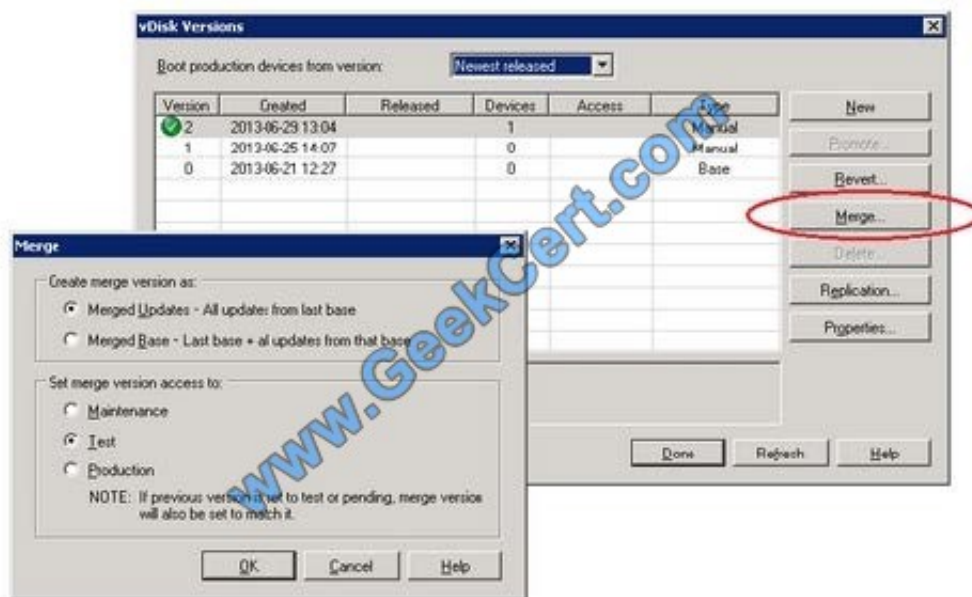

Select the access mode (Production, Maintenance, or Test) for this version after the merge completes. If no access type is selected, the vDisk mode setting selected for automatic merge, on the Farm Properties\\' vDisk Version tab, is selected

by default.

Click OK to begin the merge process.

The time it takes to complete the merge process varies based on the merge method selected and the number of differencing disks to merge. After the merge successfully completes, the new version displays in the vDisk Versions dialog. The

Type column displays either Merge Base if a full merge was selected, orMerge if a partial merge was selected.

Create Application Delivery Group

1.

 Start the Delivery Group wizard in Citrix Studio. Select the machine

Machines

Select a Machine Catalog:

Catalog	Type	Machines
⊙ WS2012 XenApp	RDS Manual Random	1

Choose number of machines to add: [1]   [−][+]

2.

When using server based operating systems you can deliver a full blow desktop complete with the menu bar (sans the Start Button on WS2012), just applications, or a combination of both. Select just Applications,

Delivery Type

You can use the machines in the Catalog to deliver desktops and applications to your users.

Learn more

Use the machines to deliver:

- ○ Desktops
- ○ Desktops and Applications
- ● Applications

3.

Specify the users or groups that need these applications.

Users

Assign users:

CONTOSO\Domain Users

4.

 Next up we can start adding the applications that are installed on our server

Applications

The applications listed below were either found on the master image(s) or the App-V publishing server. You can also add applications manually (from other network locations) and edit the properties for individual applications.

Learn more

Select applications:

⚠ No applications were found on the master image(s).		Find applications
☐ Application name	⬇	Location

Add Applications Manually

Add an Application Manually

You can manually add applications from the virtual desktop machine or from a different network location.

Learn more

Path to the executable file:

%ProgramFiles(x86)%\Adobe\Reader 11.0\Reader\AcroRd32.exe   Browse...

Command line argument (optional):

Example: http://www.example.com

Working directory:

%ProgramFiles(x86)%\Adobe\Reader 11.0\Reader   Browse...

Application name (for user):

Adobe Reader 11

Application name (for administrator):

AcroRd32

OK   Cancel

5.

 Next up we create a delivery group name.

Summary

Source Machine Catalog:	WS2012 XenApp
Machine type:	Windows Server OS
Allocation type:	Random
Number of machines added:	1 unassigned
Delivery type:	Applications
Users:	CONTOSO\Domain Users
Applications:	2
Scopes:	-

Delivery Group name:

Basic Apps

Delivery Group description for users: (Optional)

6.

Refresh my app list to test the application

You can now launch your apps and they will appear in their own window on your local computer.

7. If you want to further customize individual applications (say limit an app to a sub-group of users or change file type associations), then you can open the properties of the application in Citrix Studio.

If you check the Start Menu or Start screen on your local computer, you will now see icons for the published applications. This lets you seamlessly launch them just as if they were a native application. Launching will probably be a bit slower since behind the scenes it logs you into the XenApp server, launches the process, then remotes the window back do your client.

QUESTION 3

A Citrix Administrator creates a backup schedule that will back up all of the available vDisks. Which three critical file types must to be added to the backup schedule? (Choose three.)

A. BAK

B. PVP

C. VHD

D. LOK

E. AVHD

Correct Answer: BC

QUESTION 4

Scenario: A user reports that a financial application is performing poorly. A Citrix Administrator has accessed the server OS machine load evaluator index report from Citrix Director. The administrator reviews the data for the last three months and notices that on the last three days of the month the CPU utilization is trending at 97% while memory utilization is 48%.

Based on this information, which two measures could the administrator take to improve performance of the finance application? (Choose two.)

A. Add a vCPU to the virtual servers.

B. Provision additional virtual servers.

C. Add additional RAM to the virtual servers.

D. Move the virtual servers to a higher-performance storage subsystem.

Correct Answer: AB

QUESTION 5

A Citrix Administrator is unable to create desktop OS machines using Machine Creation Services. What is a possible cause of the issue?

A. Citrix Director is unreachable.

B. DHCP is NOT working correctly.

C. The Machine Identity Service is NOT running.

D. Antivirus software on the Delivery Controller is blocking the creation.

Correct Answer: C
