QUESTION 1

Scenario: A Citrix Administrator updates all of the machines within a Delivery Group. After the update, an application stops working. The IT manager tells the administrator to revert all machines to the previous image. How should the administrator revert all machines to the previous image?

A. By selecting \'Rollback machine update\' for the Delivery Group

B. By deleting the snapshot associated with the template virtual machine

C. By selecting \'Rollback machine update\' for the Session Machine Catalog

D. By deleting the difference disks of the virtual machines within the Delivery Group

Correct Answer: C

QUESTION 2

Scenario: A Citrix Administrator discovers that there has been a security breach that requires all users to change their password. However, users are NOT able to change their password through StoreFront. What should the administrator do to allow for password changes?

A. Allow users to change passwords at any time.

B. Allow users to change expired passwords only.

C. Enable the password expired warning notification period.

D. Enable the password change feature on the NetScaler Gateway.

Correct Answer: A

QUESTION 3

Scenario: A high number of Desktop OS machines are displaying as \'Unregistered\' in Citrix Studio. However, Desktop OS machines that are registered are functioning as expected. What is the likely cause of this issue?

A. The Delivery Controller is unable to register with DNS.

B. The Delivery Controller is NOT configured to trust XML requests.

C. A Digital certificate is NOT installed on the Desktop OS machines.

D. The affected Desktop OS machines are unable to register with DNS.

Correct Answer: D

QUESTION 4

Scenario: A Citrix Administrator needs to add a new application to an existing XenDesktop Delivery Group. The application must only be available to the Human Resources (HR) user group. How could the administrator meet the requirements of the scenario?

A. By creating a new Group Policy Object and setting security to the HR user group

B. By editing the application in Citrix Studio and limiting the visibility to the HR user group

C. By creating a new Citrix HDX Policy in Citrix Studio and filtering the policy to allow access to the HR user group only

D. By creating a new application folder in Citrix Studio for the HR user group and moving the application to the new folder

Correct Answer: B

QUESTION 5

Scenario: A Citrix Administrator configured Profile Management using Citrix policies. The administrator enabled the policies and set the order of priority. The administrator later discovered that when users log in, their profile settings are NOT

being saved for future sessions.

In which two ways could the administrator refresh policies on the Server and Desktop OS machines? (Choose two.)

A. Restart all Server and Desktop OS machines.

B. Run rsop.msc from the command-line interface.

C. Disable the Windows Firewall on the Delivery Controller.

D. Change priority of the Management Policy in Citrix Studio.

E. Run gpupdate /force from the command-line interface on all Server and Desktop OS machines.

Correct Answer: CD
