QUESTION 1

Scenario: A company has three departments with proprietary applications that need to be load-balanced on the NetScaler. The three department managers would like to use the same IP address to access their individual application, which would mean configuring three load-balanced virtual servers all using the same IP address. How can a Citrix Administrator configure this on the NetScaler?

- A. Configure three different load-balanced virtual servers with three different IP addresses on the NetScaler
- B. Configure three SNIPs with the same IP address on the NetScaler
- C. Configure three different NetScalers that use the same IP address
- D. Configure three different admin partitions that allow the use of the same IP address for each load-balanced virtual server

Correct Answer: B

QUESTION 2

Which NetScaler feature can be utilized to reuse existing TCP connections?

- A. Content Switching
- B. TCP Buffering
- C. Keep Alives
- D. Connection Multiplexing

Correct Answer: D

Explanation: TCP multiplexing is a technique that enables the reuse of existing TCP connections Reference: <https://www.citrix.com/blogs/2012/03/08/connection-multiplexing-in-netscaler/>

QUESTION 3

Scenario: A Citrix Administrator is deploying a Citrix ADC device and would like to add the NTP server to this appliance. Currently, the NTP service is configured at 192.168.55.54.

Which command-line interface command can the administrator use to complete this task?

- A. Add ntp server 192.168.55.54
- B. Add server ntp 192.168.55.54
- C. Add servicegroup NTP UDP
- D. Add service NTP 192.168.55.54 UDP 123

Correct Answer: A

Reference: <https://support.citrix.com/article/CTX120952>

QUESTION 4

Scenario: A NetScaler is configured with the following modes:

-MAC-based Forwarding -USIP -USNIP -Layer 3 mode

A Citrix Administrator configured a new router and now requires some of the incoming and outgoing traffic to take different paths through the new router. However, the administrator notices that this is failing and takes a network trace. After a short monitoring period, the administrator notices that the packets are still NOT getting to the new router from the NetScaler.

Which mode should the administrator disable on the NetScaler to facilitate the addition of the new router and successfully route the packets?

- A. MAC-based Forwarding
- B. USIP
- C. Layer 3 mode
- D. USNIP

Correct Answer: D

QUESTION 5

Scenario: A Citrix Administrator needs to build policies that control the selection of XenApp applications to which a user has access. The administrator would like for the policy decisions to be made by leveraging the HDX settings.

Which type of policy would enable this requirement?

- A. Traffic
- B. SmartControl
- C. Authorization
- D. SmartAccess

Correct Answer: D

Reference: <https://docs.citrix.com/en-us/xenmobile/server/apps/smart-access-to-hdx-apps.html>
