QUESTION 1

Which action should a Citrix Engineer take to create backups of the StoreFront subscription store so that users' subscriptions are NOT lost in the event of an environment outage?

- A. Use PowerShell commands to export the subscription store to a text file and move it to an alternative location.
- B. Use the StoreFront console to export the subscription store to an XML file and move it to an alternative location.
- C. Use the built-in SQL backup feature to create a backup of the XenApp and XenDesktop Site database.
- D. Use the built-in SQL backup feature to create a backup of the subscription store database.

Correct Answer: A

QUESTION 2

Scenario: A Citrix Engineer found that a high number of Desktop OS machines are reported as `Unregistered`. The engineer successfully logs in to one of the affected Desktop OS machines as a domain user and finds that all of the affected Desktop OS machines are on the same hosting infrastructure.

Several Desktop OS machines on the same hosting infrastructure registered successfully. However, the users in the environment have NOT reported any issues.

What is causing the Desktop OS machines to be reported as `Unregistered`?

- A. The difference in the system date and time settings on the Desktop OS machines and the Delivery Controller is greater than 5 minutes.
- B. The computer account of the master image has been deleted from Active Directory.
- C. The Broker Service is NOT running on the Delivery Controllers.
- D. The Citrix License Server is NOT communicating over port 27000.

Correct Answer: A

QUESTION 3

What is the default auto-launch behavior for published applications and desktops within a XenApp and XenDesktop environment?

- A. If a single application is published to the user, it will launch automatically.
- B. No published applications or desktops launch automatically.
- C. If a single desktop is published to the user, it will launch automatically.
- D. All published applications launch automatically.
- E. All published desktops launch automatically.

Correct Answer: C

QUESTION 4

Users in a XenApp and XenDesktop environment need to access training videos, but for security reasons the video file data should never be accessible to the endpoints.

Which multimedia rendering options should a Citrix Engineer configure to meet these requirements?

- A. Server fetching and server rendering
- B. Media content blocked
- C. Client fetching and client rendering
- D. Server fetching and client rendering

Correct Answer: D

QUESTION 5

Scenario: A Citrix Engineer is planning to set up a XenApp and XenDesktop environment. The requirements for network security are as follows:

1.

Both external and internal HDX connection traffic must be secured with end-to-end encryption.

2.

Attackers must be prevented from intercepting a user session and viewing sensitive data.

Which two implementations should the engineer include in the environment design to accomplish the requirements? (Choose two.)

- A. Workspace Environment Manager
- B. TLS enabled on Virtual Delivery Agents (VDAs)
- C. HDX Monitor
- D. Citrix Gateway HDX Proxy
- E. Citrix SD-WAN

Correct Answer: BD
