-  **800,000+** Satisfied Customers

### QUESTION 1

Scenario: A Citrix Engineer added a second Provisioning Services server to an existing Provisioning Services Site for high availability. The engineer copied the virtual hard drive (VHD) files to the store on the new Provisioning Services server.

After doing that, the second server did NOT show the disk as `available` under replication status.

Which is vDisk replication status failing for the new server?

- A. The vDisk is still in Standard mode.
- B. The disk has to be replicated through Distributed File System Replication (DFSR).
- C. The manifest file has NOT been created.
- D. The .PVP file has NOT been copied.

Correct Answer: D

---

### QUESTION 2

A Citrix Engineer needs to map a network drive for the HR user group, but does NOT want the network drive to be available to Windows XP users.

Which step can the engineer take within Workspace Environment Management (WEM) to complete this task?

- A. Add the Infrastructure Services server ADMX template to the Active Directory group policy and configure the network drive setting in a GPO. Then apply a filter to assign the No Client OS Match condition to Windows XP and assign the GPO to the OU containing the HR users.
- B. Add the network drive in the WEM environmental settings and apply the No Client OS Match condition to Windows XP. Then assign environmental setting to the HR user group.
- C. Use the Management Agent Host Configuration ADMX template to specify the network drive location. Then apply a filter to assign the No Client OS Match condition to Windows XP and a second filter to assign the Active Directory Group Match to the HR user group.
- D. Create an action mapping the network drive and apply the No Client OS Match condition to Windows XP. Then assign the action to the HP user group.

Correct Answer: D

---

### QUESTION 3

A Citrix Engineer has enabled Local Host Cache in a XenDesktop Site to manage outage situations.

---

Which three resources are supported by the Local Host Cache at the time of a database outage? (Choose three.)

- A. Pooled VDI desktops created by Machine Creation Services (MCS)
- B. Server-Hosted applications
- C. Server-Hosted desktop
- D. Static (assigned) desktops
- E. Pooled VDI desktops created by Provisioning Services (PVS)

Correct Answer: BCD

Local Host Cache is supported for server-hosted applications and desktops, and static (assigned) desktops; it is not supported for pooled VDI desktops (created by MCS or PVS).

#### QUESTION 4

Scenario:

A Citrix Engineer is managing a XenApp and XenDesktop environment that has been built with the following site architecture:

- The environment consists of one Site with three zones.
- The Primary Zone is located in datacenter A.
- Satellite Zone 1 is located in datacenter B.
- Satellite Zone 2 is located in datacenter C.
- Gateway A is in datacenter A.
- Gateway B is in datacenter B.
- A Citrix Gateway has been set up in datacenter A and datacenter B. Each Gateway has access to all zones.
- The StoreFront server group is located in the Primary Zone and enumerates all resources within the Site.
- Delivery Controllers are configured in all three zones.
- Application B is available in Satellite Zone 1 only.
- Optimal Gateway Routing has been configured so that Gateway A is preferred for the Primary Zone and Satellite Zone 2; Gateway B is preferred for Satellite Zone 1.

A user located near datacenter A logs in through Citrix Gateway and attempts to launch Application B.

Which behavior is expected in this scenario?

- A. Resource enumeration occurs using Gateway B; the HDX connection is established using Gateway A.
- B. Resource enumeration and the HDX connection are established using Gateway B.
- C. Resource enumeration occurs using Gateway A; the HDX connection is established using Gateway B.
- D. Resource enumeration and the HDX connection are established using Gateway A.

Correct Answer: A

---

#### QUESTION 5

A Citrix Engineer needs to create a Workspace Environment Management (WEM) Delegated Administrator account for a new member of the IT team who needs access to manage System Optimizations such as CPU, RAM, Process Management settings and view the entire console.

Which type of Delegated Administrator should the engineer create for the new member?

- A. Full Access
- B. Filters Manager
- C. Advanced Settings Manager
- D. System Utilities Manager

Correct Answer: A
