QUESTION 1

How can a Citrix Engineer prevent access to certain local drives on Virtual Delivery Agents (VDAs) to all users using Workspace Environment Management (WEM)?

- A. Set the "Hide Specified Drives from Explorer" option setting in the environmental settings of WEM.
- B. Configure the Restrict Specified Drives from the Explorer setting in the environmental settings of WEM.
- C. Import the Infrastructure Services server ADMX template to Group Policy and hide the local drives.
- D. Use the Management Agent Host Configuration ADMX template to restrict the local drives.

Correct Answer: B

QUESTION 2

Scenario: A Citrix Engineer needs to establish the following timeout behavior for Receiver for Web:

1.

External users need to re-authenticate after 5 minutes of inactivity on Receiver for Web.

2.

Internal users need to re-authenticate after 20 minutes of inactivity on Receiver for Web.

Which two actions can the engineer configure to achieve the timeout behavior? (Choose two.)

- A. Set Citrix policy "Session connection timer interval" to 20 minutes.
- B. Leave StoreFront Receiver for Web session setting at default value.
- C. Change Citrix Gateway global timeout setting to 5 minutes.
- D. Change timeout value in StoreFront Receiver for Web Advanced Settings.
- E. Set Citrix policy "Session connection timer interval" to 5 minutes.

Correct Answer: AC

QUESTION 3

Which Citrix technology can a Citrix Engineer use to optimize the CPU or bandwidth consumption of HDX sessions?

- A. App Layering
- B. Insight Services
- C. Provisioning Services

D. Workspace Environment Management

Correct Answer: C

Provisioning services for HDX sessions allow you to optimize CPU or bandwidth consumption by increasing and decreasing the values.

QUESTION 4

Which two requirements are needed for the target devices contained in a device collection to function successfully? (Choose two.)

- A. All target devices in the device collection must be accessible to the same user and/or user groups.
- B. All target devices in the device collection must have an Active Directory machine account which is managed by Provisioning Services.
- C. All target devices in the device collection must be located in the same XenApp and XenDesktop Site.
- D. All target devices in the device collection must be assigned at least one vDisk.
- E. All target devices in the device collection must be running from the same Operating System.

Correct Answer: BD

QUESTION 5

What are two benefits of creating a centralized vDisk Store? (Choose two.)

- A. Does NOT require vDisk files to be replicated
- B. Minimizes the storage requirement for vDisks
- C. Allows for the use of differencing disks
- D. Provides redundancy without further configuration

Correct Answer: AB
