QUESTION 1

NSROOT is the only account configured with super user rights.

In order to initiate the password recovery procedure, the engineer must _____. (Choose the correct option to complete the sentence.)

- A. logon using SCP and modify ns.conf
- B. connect to the physical NetScaler device
- C. connect using SSH to the NetScaler device
- D. logon using nsrecover/nsroot and reallocate licenses

Correct Answer: B

QUESTION 2

Scenario: A NetScaler engineer is on the phone with Technical Support to troubleshoot an issue. The NetScaler engineer generated a support archive and needs to send the file to the Technical Support

Specialist to help resolve the problem with the appliance.

In which directory could the engineer retrieve the information?

- A. /nsconfig
- B. /var/crash
- C. /var/nstrace
- D. /var/tmp/support

Correct Answer: D

QUESTION 3

Scenario: A company is hosting an external, Internet-facing website that is load balanced by a NetScaler. The backend servers are on a 1 Gbps network and clients connect over 3G connections. The Server Administrator reviewed the performance metrics on the backend servers and noticed a lot of overall network retirements and retransmissions.

Which NetScaler feature would help improve the network performance of the backend servers in this scenario?

- A. SureConnect
- B. Compression
- C. TCP Buffering
- D. Surge Protection

Correct Answer: C

QUESTION 4

Which option needs to be set on the service in order to maintain the original client-IP to the backend service?

- A. -cka yes
- B. -usip yes
- C. -cip disabled
- D. -useproxyport yes

Correct Answer: B

QUESTION 5

An engineer should use the filter (content filtering) feature to prevent _____ and _____. (Choose the two correct options to complete the sentence.)

- A. the use of unauthorized HTTP methods
- B. a client from accessing a specific IP on the back-end
- C. inappropriate HTTP headers from being sent to your Web server
- D. inappropriate MSSQL commands from being sent to your SQL server
- E. a client from a specific VLAN ID to access resources on the NetScaler

Correct Answer: AC
