QUESTION 1

What are two situations in which XenMobile notification templates are used? (Choose two.)

- A. As part of a XenMobile automated action to auto-notify when specified criteria are met.
- B. As part of the XenMobile enrollment process to auto-notify user post enrollment.
- C. As part of a XenMobile Device policy to auto-notify when a XenMobile policy becomes active.
- D. As part of the XenMobile client property policies to auto-notify when client settings are delivered to a device.

Correct Answer: AB

QUESTION 2

Scenario: A Citrix Engineer prepares to deploy XenMobile Server, ShareFile StorageZone Controllers, and StoreFront as part of a XenMobile implementation. The engineer needs to ensure that the number of communication ports opened between the Demilitarized Zone (DMZ) and the internal network is kept to a minimum, and that unauthenticated traffic is NOT allowed through to the internal network. The engineer intends to achieve these objectives by channeling all traffic into the environment through NetScaler, which is placed in the DMZ.

Where should the engineer place the components listed below in order to meet the objectives stated in the scenario?

ShareFile StorageZone Controller XenMobile Server StoreFront

- A. Place all components on the internal network segment.
- B. Place the StorageZone Controllers in the DMZ and all other components on the internal network segment.
- C. Place the XenMobile Server in the DMZ and all other components on the internal network segment.
- D. Place StoreFront in the DMZ and all other components on the internal network segment.

Correct Answer: C

QUESTION 3

Which two XenMobile applications could be upgraded by a Citrix Engineer? (Choose two.)

- A. MDX applications
- B. Web and SaaS applications
- C. Public app store applications
- D. Enterprise applications
- E. Web link applications

Correct Answer: AD

QUESTION 4

Scenario: A Citrix Engineer is designing a XenMobile Enterprise solution to support approximately 30,000 device connections. The environment must be able to sustain the failure of one node in a cluster at any given time for redundancy and maintenance purposes. Each server's specifications include four vCPUs and 16 GB of RAM.

What is the minimum number of XenMobile Servers that the engineer should recommend as part of this cluster?

- A. Two
- B. Three
- C. Four
- D. Five

Correct Answer: C

QUESTION 5

A Citrix Engineer recently enabled Worx PIN authentication on a XenMobile Server.

What should the engineer instruct users to do in order to enable Worx PIN on their devices?

- A. Log off from Worx Home and log on again.
- B. Update to the latest version of Worx Home.
- C. Refresh the policy in Worx Home.
- D. Launch a Worx Home resource.

Correct Answer: A
