### QUESTION 1

Why would the architect choose XenServer MPIO when configuring bonded network interfaces for guest VM networks?

- A. It provides load balancing of VM traffic across multiple physical NIC interfaces at a per guest basis, and offers improved distribution of traffic across physical interfaces in the bond.
- B. It sends all guest VM traffic in the bond to an active interface, which provides the best distribution of network load.
- C. It uses a hashing algorithm, which provides better distribution of traffic across the interfaces in the bond.
- D. It uses a round robin load-balancing policy, which provides better distribution of traffic across the interfaces in the bond.

Correct Answer: C

---

### QUESTION 2

What should a Citrix Architect recommend to ensure that streaming traffic is segmented and highly available?

- A. Provisioning Services servers on a shared VLAN.
- B. Provisioning Services servers using NetScaler.
- C. Provisioning Services servers on dedicated physical switches.
- D. Provisioning Services servers on dedicated VLANs.

Correct Answer: A

---

### QUESTION 3

Scenario:

CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy.

It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability.

Which FlexCast model should the architect recommend to deploy the MGMT application to the Executives/Management end-user group?

- A. Hosted Shared
- B. Remote PC
- C. On-Demand Apps
- D. Hosted VDI

Correct Answer: C

---

#### QUESTION 4

Scenario: CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy. It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability. Why is deploying MGMT as a published application on Windows Server 2008 R2 with Machine Creation Services the best solution?

- A. It offers a faster change process.
- B. End users are already comfortable working in a shared environment.
- C. It prevents XenApp server crashes.
- D. It enables faster rollbacks.

Correct Answer: C

---

#### QUESTION 5

Scenario:

CGE is experiencing numerous issues with its existing profile management solution. The Citrix Architect managing the project is tasked with designing a solution that alleviates existing issues and, if possible, minimizes the loss of existing customizations. Configuration changes need to be implemented quickly and with minimal complexity.

How can Citrix Profile management without folder redirection be configured for Sales end-user group profiles?

- A. Enable 'Profile streaming'.
- B. Enable 'Offline profile support'.
- C. Enable 'Active write back'.
- D. Enable file and folder exclusions.

Correct Answer: A
