### QUESTION 1

Scenario:

CGE is experiencing numerous issues with its existing profile management solution. The Citrix Architect managing the project is tasked with designing a solution that alleviates existing issues and, if possible, minimizes the loss of existing customizations. Configuration changes need to be implemented quickly and with minimal complexity.

Why does enabling '\\Offline profile support\\' benefit CGE\\'s Sales end-user group?

- A. It allows faster logons and logoffs.
- B. It minimizes the required storage needed for folder redirection.
- C. It simplifies home drive cleanup.
- D. It improves data accuracy in volatile environments.

Correct Answer: A

---

### QUESTION 2

Why should memory and network utilization be used to identify bottlenecks?

- A. High memory and network utilization of the Delivery Controller can indicate a high volume of user logons, indicating that the server may NOT have sufficient resources to handle the load.
- B. High memory and network utilization of the Delivery Controller can indicate that the target device will encounter delays when mounting new vDisks.
- C. High memory and network utilization of the Delivery Controller can indicate that a high number of processor-intensive applications are being utilized by the virtual desktop users.
- D. High memory and network utilization of the Delivery Controller can indicate the presence of a virus or malware.

Correct Answer: A

---

### QUESTION 3

Why is deploying four NetScaler appliances - two in the primary and two in the secondary datacenter with a NetScaler virtual server binded to a redirection policy, the best remote access design?

- A. It allows end users to connect to their primary datacenter through a secure, reliable, and cost-effective solution.
- B. It provides redundancy, while optimizing external WAN traffic.
- C. It segments the Gateway and load-balancing features of the NetScaler appliances.

D. It allows for the expected expansion of remote access usage and provides SSL VPN functionality for future needs.

Correct Answer: A

---

#### QUESTION 4

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models.

What are the benefits of using hosted shared servers with Machine Creation Services?

- A. Highest user density and lowest cost
- B. Highest level of user personalization
- C. Lowest storage requirement and highest user density
- D. Lowest cost and highest application compatibility

Correct Answer: A

---

#### QUESTION 5

What are the benefits of using hosted shared environment with Personal vDisk?

- A. It retains the single image management function while allowing users to install applications
- B. It provides a high level of security while allowing user customization
- C. It has a low storage performance requirement and high user density
- D. It delivers low-cost and high application compatibility

Correct Answer: B
