QUESTION 1

Users have requested that their Citrix connections automatically reconnect when they log in to the Citrix Web Interface after they have been disconnected while traveling between sites.

Which Web Interface feature could the XenApp administrator configure to accomplish this task?

- A. Persistent URLs
- B. Session Reliability
- C. Workspace Control
- D. Session preferences

Correct Answer: C

QUESTION 2

Scenario: A XenApp administrator must recommend a database option for the new XenApp 6.5 data store. The new farm will have more than 100 XenApp servers and 500 published resources, support more than 5,000 concurrent users and have two zones separated by a WAN connection.

Which two database options should the administrator recommend? (Choose two.)

- A. IBM DB2 9.7
- B. Oracle Enterprise 11.1
- C. Microsoft SQL Server 2008
- D. Microsoft SQL Server Express 2008

Correct Answer: BC

QUESTION 3

Scenario: A Citrix administrator manages a mixed environment consisting of desktops, XenApp and XenDesktop. Management desires that:

login times be decreased

user profiles are stored in a centralized location

user changes be saved

user changes be made available to user sessions accessed from any desktop, XenApp server or XenDesktop connection

Based on these requirements, which type of profile should the administrator implement?

- A. Local
- B. Roaming
- C. Mandatory
- D. Citrix Profile Management

Correct Answer: D

QUESTION 4

Scenario: A company recently upgraded all their Citrix licenses from XenApp Enterprise to XenApp Platinum. The Citrix License Server has been correctly updated and configured with the correct Citrix license files. Now users are NOT able to connect.

Which step should the administrator take to allow users to connect again?

- A. Restart the server hosting the Citrix data store.
- B. Upgrade the Delivery Services Console to the AppCenter.
- C. Update the XenApp product edition in the Computer policy.
- D. Restart all Citrix servers reporting 20,000 as their current load.

Correct Answer: C

QUESTION 5

An administrator would need to add multiple farms to a Web Interface configuration to _____. (Choose the two correct options to complete the sentence.)

- A. protect against IMA failure
- B. load balance the XML Service
- C. consolidate applications from multiple farms
- D. increase the performance of application enumeration
- E. provide a seamless migration path across farm upgrades

Correct Answer: CE
