QUESTION 1

In order for an administrator to download licenses from the company\\'s mycitrix.com portal, the administrator must be added _____ . (Choose the correct option to complete the sentence.)

- A. as a Citrix Administrator in the AppCenter
- B. into the contacts for the company in mycitrix.com
- C. to the Purchasing Active Directory group in the company
- D. as a Domain Administrator in the company\\'s Active Directory

Correct Answer: B

QUESTION 2

When using the Gateway Direct secure access method in the Web Interface, the XenApp administrator must provide the _____ of the Access Gateway server. (Choose the correct option to complete the sentence.)

- A. IP address
- B. SSL certificate
- C. NetBIOS name
- D. Fully Qualified Domain Name (FQDN)

Correct Answer: D

QUESTION 3

Scenario: The IT administrator at an online education institution manages a XenApp farm that provides access to lectures and other class materials. The students and faculty members connect to the XenApp farm published applications from remote computers that are NOT part of the corporate Active Directory domain. Each student and faculty staff member is assigned a unique set of Active Directory credentials with a password expiration policy of 15 days. The administrator needs to allow users to change their passwords from the Web Interface site since the computers are NOT part of the domain.

In order to configure the Web Interface to allow students and faculty members to change their passwords from the Web Interface site, the administrator could allow users to change expired passwords by contacting the _____. (Choose the correct option to complete the sentence.)

- A. data store
- B. server farm
- C. domain controller directly
- D. domain controller directly with fallback to the data store

Correct Answer: B

QUESTION 4

Scenario: An administrator is hired to implement a new XenApp server farm in an existing network. The administrator needs to manage the Citrix license server, which is located behind a firewall.

Which port should the administrator ask the network security team to configure on the firewall to allow the administrator to manage the license server?

- A. 135
- B. 2513
- C. 7279
- D. 8082
- E. 27000

Correct Answer: D

QUESTION 5

Scenario: An administrator recently configured Session Reliability on a XenApp server which delivers one published application to 20 users on the local network. After configuring Session Reliability, the administrator ran Microsoft TCPView to monitor a service that Session Reliability uses. The administrator notices that users are connecting to the published application on port 443 but NOT on the default Session Reliability port. The administrator verified that Session Reliability is configured and working.

Which two reasons explain why the users are connecting to the published application on port 443? (Choose two.)

- A. SSL/TLS is enabled in the published application's properties.
- B. Data encryption has been enabled using the SSL Relay Configuration tool.
- C. A policy is enabled to encrypt the session data between the server and user devices.
- D. The published application is configured to allow connections made through Access Gateway Advanced Edition.

Correct Answer: AB
