QUESTION 1

Scenario: An administrator is planning to upgrade the RAM in a XenServer host. Due to business restrictions, the host must be shut down during normal business hours. High availability is enabled in the XenServer resource pool.

Which step does the administrator need to take before shutting down the XenServer host to allow the virtual machines to run after the host is shut down?

- A. Disable high availability.
- B. Export the virtual machines.
- C. Place the host in maintenance mode.
- D. Copy the virtual machines to another host.

Correct Answer: C

QUESTION 2

Scenario: An administrator needs to add two new XenServer hosts to an existing pool. Before adding a host to the pool, the administrator created a network bond on the pool master.

Which CLI command must the administrator run to replicate the bond on the new hosts?

- A. xe pool-join
- B. xe bond-create
- C. xe network-create
- D. xe pool-param-set

Correct Answer: A

QUESTION 3

An administrator CANNOT use XenCenter to connect to an existing standalone XenServer host that has six virtual machines running.

What could be causing this issue?

- A. NTP is NOT configured.
- B. The XAPI Service stopped.
- C. The XenServer DNS configuration is incorrect.
- D. Communication with Active Directory has been lost.

Correct Answer: B

QUESTION 4

Scenario: An administrator is moving a XenServer host from the New York datacenter to the London datacenter. During the installation of XenServer, the default NTP settings were selected.

How must the administrator ensure that the XenServer host has the correct time settings?

- A. Configure the time in the host BIOS.
- B. Configure the time zone in the ntp.conf file.
- C. Change the time zone using the xsconsole.
- D. Change the NTP servers to the London NTP servers.

Correct Answer: C

QUESTION 5

Scenario: A XenServer host has a Fibre Channel adapter which is connected to the corporate SAN. The SAN Administrator created a new LUN and presented it to the XenServer host.

Which storage repository type does the administrator need to use to be able to create virtual machines on the LUN?

- A. Local LVM
- B. EXT3 VHD
- C. Hardware HBA
- D. Software iSCSI

Correct Answer: C
