QUESTION 1

Your database is in shutdown state. What will happen if you issue next command: SQL> startup

- A. instance will started
- B. instance started and DB is mounted
- C. instance started, DB opened and finally mounted
- D. instance started, DB mounted and finally opened

Correct Answer: D

QUESTION 2

You are managing an Oracle Database 11g database running in ARCHIVELOG mode. The Flash Recovery Area is specified as the destination for the archived redo log files. You notice this warning in the alert log file:

ORA19815: WARNING: db_recovery_file_dest_size of 3221225472 bytes is 100.00% used, and has 0 remaining bytes available.

What would you do to reclaim the used space in the Flash Recovery Area? (Choose two.)

- A. Back up the Flash Recovery Area.
- B. Decrease the retention time for the database backup and flashback log files.
- C. Manually delete all the archived log files from the Flash Recovery Area by using operating system (OS) commands.
- D. Manually delete all the expired backup sets from the Flash Recovery Area by using operating system (OS) commands.

Correct Answer: AB

QUESTION 3

You have statistics collected for some selected tables. Your requirement is that the statistics for the tables and all dependent indexes must not be overwritten by further statistics collection until a certain point of time. How would you achieve this?

- A. Lock statistics for the tables.
- B. Change STALE_PERCENT to zero for the tables.
- C. Set the TIMED_STATISTICS parameter to TRUE.
- D. Set the STATISTICS_LEVEL parameter to BASIC.
- E. Set the OPTIMIZER_USE_PENDING parameter statistics to TRUE.

Correct Answer: A

QUESTION 4

Which statement is true about the Manageability Monitor (MMON) background process?

- A. It transfers statistics from memory to disk at regular intervals.
- B. It coordinates the rebalance activity for disk groups when ASM is used.
- C. It communicates with the Automatic Storage Management (ASM) instance on behalf of the database instance.
- D. It performs dynamic memory management when Automatic Shared Memory Management is enabled for the database instance.

Correct Answer: A

QUESTION 5

In which situations does the Oracle Data Pump use external tables and not the direct path load while exporting a table? (Choose all that apply.)

- A. if a table is not in a cluster
- B. if a table has an active trigger
- C. if a table has an encrypted column
- D. if a table has a column of data type LONG defined on it
- E. if a table has a referential integrity constraint defined on it

Correct Answer: BCE
