QUESTION 1

Your multitenant container database (CDB) CDB1, has no startup triggers and contains multiple pluggable databases (PDBs).

It was started up by using the command which executed successfully with no errors:

```
SQL> STARTUP MOUNT
```

Which two statements are true? (Choose two.)

- A. All redo logs are opened.
- B. All control files are opened.
- C. All tempfiles are opened.
- D. CDB\$ROOT is opened.
- E. The SPFILE is opened.

Correct Answer: AD

QUESTION 2

A database is running in archivelog mode. The database contains locally managed tablespaces. Examine the RMAN command:

```
RMAN> BACKUP AS COMPRESSED BACKUPSET SECTION SIZE 1024M DATABASE;
```

Which statement is true about the execution of the command?

- A. The backup succeeds only if all the tablespaces are locally managed.
- B. The backup succeeds only if the RMAN default device for backup is set to disk.
- C. The backup fails because you cannot specify section size for a compressed backup.
- D. The backup succeeds and only the used blocks are backed up with a maximum backup piece size of 1024 MB.

Correct Answer: D

QUESTION 3

Users report this error message when inserting rows into the orders table: ERROR at line1:

```
ORA-01654:unable to extend index USERS.ORDERS_IND by 8 in tablespace INDEXES
```

You determine that the indexes tablespace is out of space and there is no free space on the filesystem used by the Oracle database.

Which two must you do to fix this problem without affecting currently executing queries? (Choose two.)

- A. drop and re-create the index
- B. coalesce the order.ind index
- C. coalesce the indexes tablespace
- D. perform an on line table rebuild using dbms_redefinition
- E. rebuild the index online moving it to another tablespace that has enough free space for the index

Correct Answer: BE

QUESTION 4

Which four actions are possible during an Online Datafile Move operation? (Choose four.)

- A. Creating and dropping tables in the datafile being moved
- B. Performing file shrink of the data file being moved
- C. Querying tables in the datafile being moved
- D. Performing Block Media Recovery for a data block in the datafile being moved
- E. Flashing back the database
- F. Executing DML statements on objects stored in the datafile being moved

Correct Answer: ACDF

QUESTION 5

Which two statements are true about recovering logically corrupted tables or table partitions from an RMAN backup? (Choose two.)

- A. Tables or table partitions can be recovered by using an auxiliary instance only.
- B. Tables or table partitions with a foreign key cannot be recovered.
- C. Tables or table partitions can be recovered only when the database is in mount state.
- D. Tables or table partitions from the system and sysaux tablespaces cannot be recovered.
- E. Tables with not null constraints cannot be recovered.

Correct Answer: AD
