QUESTION 1

In the ORCL database, USER1 has unlimited quota on TBS1 and TBS2. The USER1.EMP table with primary key EMP_ENO_PK resides in TBS1. USER1.EMP_IDX residing in TBS2 is an index on U1.EMP.ENAME. TBS1 is exported from ORCL by using this command:

```
[oracle@host01 ~]$ expdp system/oracle tablespace=tbs1
directory=exp_dir dumpfile=tbs1.dmp
```

The TESTDB database has a TBS1 tablespace but no TBS2. The SYSTEM user in TESTDB executes this command:

```
[oracle@host01 ~]$ impdp system/oracle directory=exp_dir
dumpfile=u1.dmp tablespace=tbs1
```

What is the result and why?

A. It imports EMP, EMP_ENO_PK, and the unique index associated with EMP_ENO_PK and EMP_IDX.

B. It imports only EMP, EMP_ENO_PK, and the unique index associated with EMP_ENO_PK.

C. It fails because TESTDB has TBS1.

D. It imports only EMP.

E. It fails because TESTDB does not have TBS2 to create EMP_IDX.

Correct Answer: B

QUESTION 2

Examine these commands: What is the expected result?

```
SQL> DESC u1.emp

Name                    Null?           TYPE
----------------        ----------      --------------------
EMP_ID                                  NUMBER
ENAME                                   VARCHAR2(3)
SAL                                     NUMBER

SQL> exit

[oracle@host01 ~]$ cat emp.dat

1,Ben,2000
2,Alan,3000
3,Kevin,4000
4,Sam,5000

[oracle@host01 ~]$ sqlldr  u1/oracle table=emp
```

A. It fails because EMP.DAT has some records with more than three characters corresponding to U1.EMP.ENAME.

B. Only the first row in EMP.DAT is inserted into U1.EMP.

C. Only the first and fourth rows in EMP.DAT are inserted into U1.EMP.

D. All rows in EMP.DAT are inserted into U1.EMP but ENAME is set to ### for the second and third rows.

E. All rows in EMP.DAT are inserted into U1.EMP but ENAME is set to NULL for the second and third rows.

Correct Answer: D

QUESTION 3

Which two types of files are opened by a database instance in the NOMOUNT state?

A. control files

B. the alert log

C. the initialization parameter file

D. data files

E. online redo logs

Correct Answer: CD

Reference: http://www.dba-oracle.com/concepts/starting_database.htm

QUESTION 4

Which three statements are true about an spfile? (Choose three)

A. It contains only static initialization parameters.

B. It is the first file processed at instance startup.

C. It can be edited by SYS when the database instance is shut down.

D. It must exist for a database instance to start.

E. It can be used to create a pfile.

F. It contains initialization parameters whose values can be changed using the ALTER SYSTEM command.

Correct Answer: DEF

QUESTION 5

Which is a machine image in Oracle Cloud?

A. the number of OCPUs and amount of memory allocated to an instance

B. the physical persistent block storage space allocated to an instance

C. the number of OCPUs, amount of memory, and persistent block storage space allocated to an instance

D. a template of a virtual hard disk of specific size without an operating system installed

E. a template of a virtual hard disk of specific size with an installed operating system

Correct Answer: E
