QUESTION 1

Which three options are correct about application workbooks?

- A. Worksheets can be modified by using the Cube Designer wizard.
- B. Worksheets cannot be modified directly in Excel.
- C. Application workbooks support the generation reference dimension build method.
- D. Multiple dimensions can be placed on a single worksheet.
- E. Application workbooks can have data load worksheets and calculation worksheets.

Correct Answer: ACE

QUESTION 2

The data loads for your Essbase cube are taking many hours, due to which the cube is unavailable to the user for extended periods every day. You are assigned the task of optimizing the data load process. Which are four optimization steps?

- A. making the data source as small as possible by eliminating redundancy
- B. grouping the data source by sparse-dimension member combination
- C. positioning data in reverse order as the outline
- D. switching from multiple data fields to a single data field
- E. loading from the Essbase server
- F. using Parallel load

Correct Answer: ABEF

QUESTION 3

You have added new columns to the source table. What should you do to include the new columns in your data model?

- A. Update Data Model
- B. Add Columns from Database
- C. Synchronize with Database
- D. Connect to Tables

Correct Answer: C

QUESTION 4

Which two statements are true regarding configuring filters to control visual content?

- A. Expression filters cannot be applied in the filter steps of Oracle Analytics Cloud Data Visualization data flows.
- B. Variables may be employed in all Data Visualization filter types (that is, Range, List, Date, Expression).
- C. Application role filters for fact and dimension tables are defined in the Oracle Analytics Cloud Data Modeler.
- D. When the Oracle Business Intelligence Enterprise Edition repository is used as a data source, filters defined in the initialization blocks with the client administration tool are automatically inherited in Data Visualization.

Correct Answer: CD

QUESTION 5

Which two statements are true about the Data Sync functionality?

- A. Data Sync can create and manage surrogate keys in target tables.
- B. Data Sync is the only mechanism available in Oracle Analytics Cloud Standard Edition for loading data into DBaaS tables.
- C. To manage extractions and loads from cloud-based sources, Data Sync can invoke the REST APIs of the Oracle Database Cloud Service as well as the Oracle Business Intelligence Cloud Service.
- D. Data Sync cannot load incremental source insertions and updates; only full refresh loads are supported.

Correct Answer: BC
