QUESTION 1

Which three statements describe webhooks in Commerce Cloud? (Choose three.)

- A. Function webhooks support synchronous calls to external applications
- B. Webhooks are only configured using the Server Extensions REST API
- C. Event webhooks support asynchronous, event-triggered outbound calls to custom integration endpoints
- D. Webhooks can be defined separately for Storefront, Preview, and Agent instances
- E. Webhooks use the POST HTTP method for the outgoing call

Correct Answer: ACE

QUESTION 2

The Payment Processing menu on the Settings page of the Administration UI has a Payment Options property with two choices: Full Payment Required and Allow Partial Payment.

When should the Allow Partial Payment option be selected?

- A. One of the supported payment methods used on the order requires shopper action during payment processing
- B. All payment methods used on the order can be processed at the same time
- C. The storefront uses standard payment widgets
- D. If one payment of a partial payment fails, the successful payments are voided immediately and the order stays incomplete

Correct Answer: A

Reference: https://docs.oracle.com/cd/E89191_01/Cloud.17-4/ExtendingCC/html/s3202understandthepaymentoptionssetti01.html

QUESTION 3

A company has many anonymous shoppers who pay for orders with split payments. In their prior system, they ran into issues when one of the payment methods failed and the order was in a pending state waiting for the rest of the payment. In those cases, the shoppers could not retrieve the orders when they returned to the site because they did not have access to the order number?

The company plans to configure Commerce Cloud to avoid this situation where the anonymous shopper does not know the order ID.

What step can the company take in Commerce Cloud to avoid this happening?

- A. No default configurations exist to help with this problem. This can only be handled in the custom payment integration system.
- B. Enable the Order Placed Email to send the order ID when the payment goes through.
- C. Select the Payment Settings option to notify anonymous shoppers of partial payment
- D. Enable the Order Payment Initiated Email to send the order ID when the order is created

Correct Answer: B

QUESTION 4

Consider the following code from the widget.json for a sample custom widget:

```
{
  "global": false,
  "availableToAllPages": true,
  "javascript": "myCustomWidget",
  "jsEditable": true,
  "i18nresources": "myCustomWidget",
  "config": {},
  "imports": [],
  "minWidth": 4,
  "hiddenFromSiteStudio": false,
  "translations": [
    {
      "language": "en",
      "name": "My Custom Widget"
    }
  ],
  "version": 1
}
```

For which pages will the widget appear in the Component library in the Design page in the Administration UI?

- A. The widget will appear for all pages
- B. The widget will appear for all global pages only
- C. The widget will not appear for any pages
- D. The widget will appear for all product pages only

Correct Answer: D

QUESTION 5

Your customer has a B2B Storefront instance designed to have three English language sites: North America, European Union, and Asia.

What two components will the storefront developers need to configure to support one or more sites? (Choose two.)

- A. The settings for each layout to specify one or more sites valid for that layout
- B. Associated component text snippets that are valid for each site
- C. The layout components to include branding, images, and page content that are specific for the site
- D. The profile Navigation – Account Shoppers widget instance settings to specify a URL entry for each layout per site

Correct Answer: CD
