### QUESTION 1

An organization has implemented loyalty points as a payment currency by creating a payment gateway extension with `loyaltyPoints` as one of the `paymentMethodTypes` and configuring the Custom Currency Payment webhook. What additional step does the organization need to do to add loyalty points as a payment option on the Payments Method widget?

- A. Create a custom widget extension called Loyalty Payment and add it to the checkout layout
- B. Create a new checkout layout with custom widgets for payment
- C. Nothing. The Payments Method widget already includes loyalty points as a payment option
- D. Add the baseline Loyalty Payment widget to the checkout layout on the Design page

Correct Answer: A

### QUESTION 2

A company has Site A as its default site. It has created and enabled Site B and is ready to make Site B the default site and delete Site A.

Which statement describes the steps involved in deleting Site A?

- A. When you delete Site A, Site B will be set as the new default site automatically
- B. You must first make Site B the default site and then you can delete Site A
- C. Disable the default Site A first and then delete it
- D. It is not possible to delete a site. You can disable it using the `updateSite` endpoint

Correct Answer: D

### QUESTION 3

Which four statements describe the Commerce Cloud payment webhooks? (Choose four.)

- A. Webhooks can be created for your custom integration
- B. The Credit Card Payment webhook is used for most credit cards, except 3D Secure cards and stored cards
- C. The Secure Credit Card Payment webhook is used for 3D Secure cards and stored cards
- D. The Generic Payment webhook is used for most payment types
- E. Webhooks can be configured in the Administration UI or using REST APIs
- F. The Custom Currency Payment webhook is used for loyalty points

Correct Answer: ABEF

#### QUESTION 4

A company has many anonymous shoppers who pay for orders with split payments. In their prior system, they ran into issues when one of the payment methods failed and the order was in a pending state waiting for the rest of the payment. In

those cases, the shoppers could not retrieve the orders when they returned to the site because they did not have access to the order number?

The company plans to configure Commerce Cloud to avoid this situation where the anonymous shopper does not know the order ID.

What step can the company take in Commerce Cloud to avoid this happening?

- A. No default configurations exist to help with this problem. This can only be handled in the custom payment integration system.
- B. Enable the Order Placed Email to send the order ID when the payment goes through.
- C. Select the Payment Settings option to notify anonymous shoppers of partial payment
- D. Enable the Order Payment Initiated Email to send the order ID when the order is created

Correct Answer: B

---

#### QUESTION 5

Consider the following code from the widget.json for a sample custom widget: For which pages will the widget appear in the Component library in the Design page in the Administration UI?

```
{
  "global": false,
  "availableToAllPages": true,
  "javascript": "myCustomWidget",
  "jsEditable": true,
  "i18nresources": "myCustomWidget",
  "config": {},
  "imports": [],
  "minWidth": 4,
  "hiddenFromSiteStudio": false,
  "translations": [
    {
      "language": "en",
      "name": "My Custom Widget"
    }
  ],
  "version": 1
}
```

- A. The widget will appear for all pages
- B. The widget will appear for all global pages only
- C. The widget will not appear for any pages
- D. The widget will appear for all product pages only

Correct Answer: D
